APPENDIX 4 Publications	66
APPENDIX 5 Statistical summary	69
APPENDIX 6 Fees and charges	70

The Museum of Victoria was established in 1983, upon proclamation of the *Museums Act* 1983. This Act of the Victorian Parliament provided for the amalgamation of the National Museum of Victoria with the Science Museum of Victoria to form the Museum of Victoria.

The Museum is administered by the Council of the Museum of Victoria, appointed under the Act by the Minister for the Arts. The Director of the Museum is appointed under the Act by the Governor in Council upon the recommendation of the Minister for the Arts, and is the chief executive officer of the Council.

The Museum is located at 238 Swanston Street, Melbourne, Victoria, 3000, telephone (03) 669 9988.

The Honourable Evan Walker, MLC
Minister for the Arts

Sir,

In presenting this account to you of the work of the Museum of Victoria in 1988/89 we now say that the year was one of very great significance. This will be well appreciated by you in the light of the Government's decision to relocate the majority of the Museum's activities to the new facilities to be constructed at Southbank. With assistance of a selection group consisting of myself as Chairman, Mr Robert Edwards, Director of the Museum, Mr Edmund Capon, Director of the Art Gallery of New South Wales, architects Mr Peter Elliott and Ms Lecki Ord and Mr John Weston of the Victorian Government Major Projects Unit, a recommendation was forwarded to you as Minister for Major Projects that led to the appointment of the architectural firm of Daryl Jackson Pty Ltd to design the Southbank complex. Work continued on the development of the new science and technology centre at the former Melbourne and Metropolitan Board of Works pumping station at Spotswood.

The Museum benefitted greatly from the additional funds provided to it in the 1988/89 State Budget. These resources were expended on conservation of key items in the collections, registration of collections, staging of exhibitions, development of policies and programs for the new facilities being planned for Southbank and Spotswood, and improvements to the current facilities. The most significant of these physical improvements was the installation of air-conditioning in one of the major exhibition galleries. This upgrading of environmental conditions enabled the Museum to stage a program of high-quality local and international exhibitions.

Of course, the full potential of the benefits of these additional resources will be realised only if sufficient sums are made available in subsequent years to continue the improvements already in train. It is appreciated that budgeting problems of considerable magnitude exist for the State, given the current economic conditions. The Council is confident, however, that the important project of relocating the Museum to its exciting new site will remain a high priority for the Government.

It has been a great year of exhibitions. The highlight of the program was the extremely successful Melbourne season of *Gold of the Pharaohs*. The Australian tour of this priceless collection of ancient Egyptian treasures, organised jointly by the Museum of Victoria and the International Cultural Corporation of Australia Ltd, attracted almost one million visitors, 250,000 of whom attended the Melbourne season. This major cultural event proved to be the most successful exhibition ever to tour this country.

Another highlight was the exhibition of antiquities from Northern Greece, entitled *Ancient Macedonia*. The Prime Minister of Australia and the President of Greece officiated at the opening of the Australian tour at the Museum of Victoria.

Other exhibitions to open in 1988/89 included *Koorie*, organised by the Koorie Cultural Heritage Trust. This exhibition was a major step forward in bringing Victorian Koorie culture to a wider audience. *Shipwrecks*, *History of Women in Science and Technology*, and *Looks Phoney*, a Telecom exhibition, were also mounted. Council is indebted to the generosity of the many corporate sponsors and private benefactors who support the exhibitions and other programs of the Museum, whether through the donation of artefacts, the granting of funds or the provision of advice and expertise.

The Division of Science and Technology's Photo Archive Project launched the very successful book *Mum and Dad Made History*. Work commenced also on a second publication, entitled *Having a Go: Bill Boyd's Mallee*.

Research plays a very important role in the activities of the Museum. Curatorial staff continue to receive national and international recognition for their research on the collections, and a steady stream of high-quality scholarly publications was produced throughout the year, including the *Memoirs* and occasional papers.

The highest priority activities for the year related to the development of the new facilities at Southbank and Spotswood. Exhibition proposals were developed, together with strategies for obtaining sponsorship. Work continued on the registration and maintenance of the collections in order to ensure that key items are ready for exhibition in the new buildings. Staff worked closely with the architectural firms preparing the functional brief and then the masterplan for the Southbank project, and with the various sub-consultants involved in these processes. In short, significant progress was made in preparing for the major step of relocating to the new premises, the construction of which was approved early in the year by your Government.

Eleven meetings of Council were held during 1988/89. The office bearers during the year were the President, Dr Ray Marginson, the Deputy President, Mr Peter Parkin, and the Treasurer, Mr Ian Sinclair.

It was with very deep regret that Council learned of the death on 16 June of Mr Peter Parkin, Deputy President of Council. Mr Parkin's enthusiastic participation in the activities of the Museum will be sadly missed. He had previously served for four years as President of the Friends of the Museum.

Ms Jenny Love was appointed to Council on 28 February 1989. On 30 June 1989 Mr Peter Harvie, Ms Valmae Heap and Dr Marilyn Lake retired from Council, to be replaced by Mr Phillip Adams, Dr Marian Aveling and Ms Jill Gallagher on 1 July.

Council was pleased to invite Mr Harold Kemp, Ms Sarah Myer and Professor Jim Warren to become Fellows of the Museum, in recognition of their significant contributions to the activities of the Museum.

Council wishes to congratulate the Director, Mr Robert Edwards, on being admitted as an Officer of the Order of Australia in the Queen's Birthday Honours.

Members of the Council believe that 1988/89 was arguably the most significant year in the history of one of Australia's most important cultural and scientific institutions. The expressed commitment of the Victorian Government to the development of the new facilities so urgently required will ensure that Victorians and visitors to this State will, in a few short years, have access to a world-class museum; many millions of objects and artefacts in our collections will be publicly accessible for the first time and a major contribution will have been made to the imaginative concept of the development of the Southbank site. We continue to work enthusiastically to achieve this great objective.

A handwritten signature in dark ink, reading "Ray Marginson". The signature is fluid and cursive, with a large initial "R" and a long, sweeping underline.

Dr Ray Marginson, AM
President
Council of the Museum of Victoria

The Museum's Natural History Division manages the geological and zoological collections, undertakes scholarly research and provides an information service to the public, to scientists and to government departments. Staff offer expert input to the Museum's exhibition and educational support programs.

DEPUTY DIRECTOR'S REPORT

Council this year endorsed an important development in functional management within the Natural History Division. Departments have been grouped to enhance interactive and co-operative planning, fostering the growth of 'centres of excellence', covering strong collecting areas.

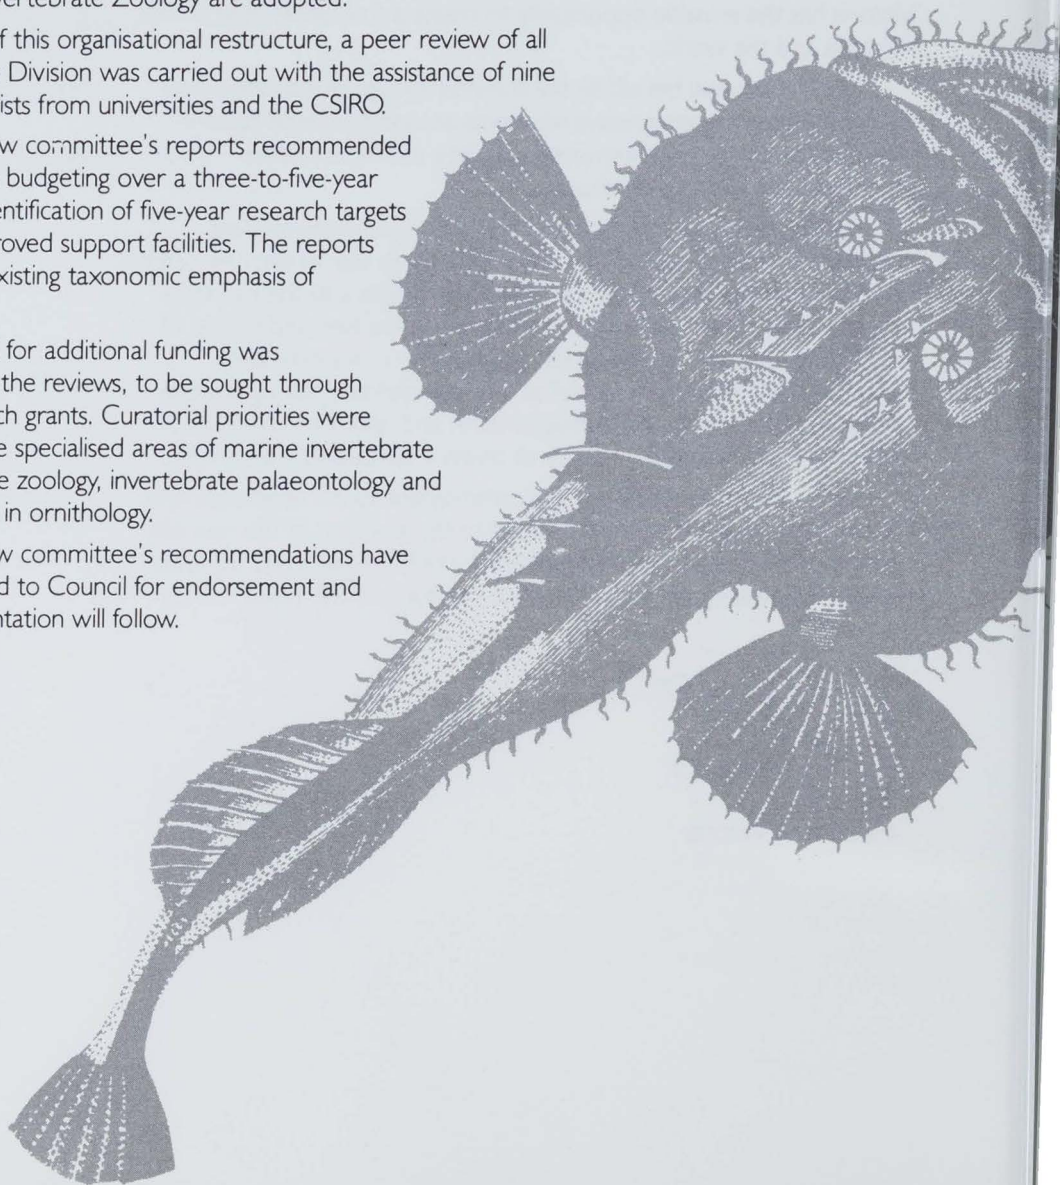

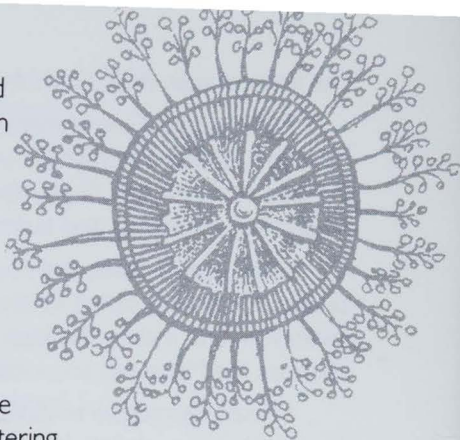

The Earth Science functional group will specialise in Invertebrate Palaeontology as a centre of excellence; Marine Biology will focus on Marine Invertebrates; Terrestrial Biology on Molecular Biology; Invertebrate Ecology on Invertebrate Survey. For the purposes of this report, the previous groupings with Earth Science, Invertebrate Zoology and Vertebrate Zoology are adopted.

As part of this organisational restructure, a peer review of all sections of the Division was carried out with the assistance of nine eminent scientists from universities and the CSIRO.

The review committee's reports recommended more effective budgeting over a three-to-five-year period and identification of five-year research targets as well as improved support facilities. The reports affirmed the existing taxonomic emphasis of research.

The need for additional funding was emphasised in the reviews, to be sought through outside research grants. Curatorial priorities were identified in the specialised areas of marine invertebrate ecology, marine zoology, invertebrate palaeontology and genetic studies in ornithology.

The review committee's recommendations have been submitted to Council for endorsement and their implementation will follow.

Staff developments

Staffing underwent a number of changes during the year. The Assistant Survey Officer position was filled, enabling the Environmental Records Department to operate efficiently. Technical Officers were appointed in Invertebrate Palaeontology and Invertebrate Zoology, with further Technical Assistants needed.

Ms Linda Huxley, Technical Officer in Mammalogy for the past 13 years, left the Museum.

Volunteers and short-term grant employees have assisted in many departments, especially in computer registration of specimens. The Museum is most grateful for their valuable work.

Important outside links were maintained. Research students from Melbourne and Macquarie Universities were supervised by Dr Chung Cheng Lu, and Dr Martin Gomon monitored the work of another student from Melbourne University's Zoology Department.

Dr Bill Birch was appointed Associate Editor of the prestigious journal *The Mineralogical Record*.

Staff of the Department of Ornithology trained two officers from the Department of Conservation, Forests and Lands in bird identification as well as offering Frankston TAFE students instruction in wildfowl identification.

The intern training program for RMIT students continued with placements in the Division's Departments of Invertebrate Zoology, Ichthyology, Mammals, Herpetology and Entomology.

Scientific publications

The Memoirs of the Museum of Victoria project continues to attract manuscripts, now published in two 500-page issues each year. Volume 19 includes papers on molluscs, crustaceans, insects, pseudoscorpions, mites and worms. Volume 20 begins with a major opus on sponges from Bass Strait. *Occasional Papers from the Museum of Victoria*, Volume 4, was published in 1989, with four papers on the entomology collection.

Dr Tom Darragh's monograph on the Tertiary Volutidae was published during the year, creating considerable interest among shell collectors, who bought all of the 150 extra copies printed.

EARTH SCIENCE

The three curatorial units in this section manage the State collections of rock, minerals and fossils, which provide a record of the nature and composition of the earth over its entire history, with particular emphasis on Victoria.

Mineralogy and Petrology

Research

Most collection-based research centred on three areas this year:

Characterisation of new Australian mineral species including ulrichite from Lake Boga in Victoria and mawbyite from Broken Hill in New South Wales;

Investigation of the paragenesis of rare phosphate and arsenate minerals in the oxidised zone at Broken Hill, with specimens provided by Minerals Mining and Metallurgy Pty Ltd;

Study of the chemical composition of Victorian zeolite minerals for a book to be published by the Mineralogical Society of Victoria.

Curation

Curatorial work continued to focus on the mineralogy collection, with 75 per cent of the 40,000 registered minerals now on the Titan database, a task on which volunteers played a major role.

Progress was made on sorting, cleaning and re-housing the Geological Survey collection. Several hundred specimens collected by Dr Birch at Narssarsuk, Greenland, were cleaned, sorted and identified before registration. Important reference and research material collected at Lake Boga and from the Kintore open-cut at Broken Hill was sorted and registered.

Precise identification of several hundred specimens was facilitated by extensive use of the electron microprobe at Melbourne University and the scanning electron microscope at RMIT.

Formal agreement for the transfer of Melbourne University's rock and mineral collection was signed in November.

Acquisitions

Registrations this year comprised 537 minerals, 47 rocks and 7 meteorites. Minerals purchased included several fine cinnabar crystals on quartz, from China; superb green mimetite crystals from Elura near Cobar in New South Wales; a suite of galena, sphalerite and marcasite specimens from the Cadjebut deposit in Western Australia; and magnificent display specimens of green fluorapophyllite and cavansite from India.

Exchanges with museums abroad expanded the Division's collection with rare minerals from Eifel in Germany, Ireland and Cap Garonne in France.

Important suites of Australian minerals came from field collecting at sites around the country.

Dr Birch participated in an international collecting and research expedition to Narssarsuk and Ilmausaq in Greenland in July 1988, resulting in significant acquisitions.

Donations included a collection of natural glass from Mt Darwin, Tasmania, and a large volcanic bomb from Mt Noorat in western Victoria. Local collectors gave important specimens of Victorian zeolites, and type specimens of new Australian minerals ulrichite, gartrellite and cobaltaustinite were added to the reference collections.

Other activities

Mineralogy Department staff continued their active involvement with related and affiliated organisations.

Dr Birch co-supervised two research students from Melbourne University and extended his editorial duties to include the special volume on zeolites to be published by the Mineralogical Society of Victoria later in 1989. Co-ordination of the project, including text, photography and fund-raising, is being undertaken by D. Henry.

Invertebrate Palaeontology

Research

Dr Holloway's revision of the classification of the trilobite order Lichida (in collaboration with Dr A.T. Thomas of Britain's Birmingham University) was published in August in *Philosophical Transactions of the Royal Society of London*.

The study covers all known species of Lichida, classifying them in 49 genera and subgenera (6 newly described), within 2 families and 5 subfamilies. New diagnoses are given for all taxa, with a summary of their geographical and stratigraphical distribution as well as a discussion of the evolution of the Lichida.

The revision will serve as the basis for the Lichida entry in the American reference work, *Treatise on Invertebrate Palaeontology*.

In other research, Dr Holloway's work on a diverse trilobite fauna from Silurian limestones found in the Orange district of New South Wales, carried out in conjunction with Dr L. Ramskold of the Swedish National Museum of Natural History, is nearing completion.

Dr Darragh's research, in collaboration with Dr G.W. Kendrick of the Western Australian Museum, on the late Cretaceous bivalves from the Miria Formation was completed and the manuscript was submitted for publication. The work describes one new genus and records 30 species of which seven are new.

This is the first detailed study in Australia of a late Cretaceous mollusc fauna. Work on the gastropods from this formation was begun this year and descriptions of some 50 per cent of the taxa present have been completed.

Curation

Much curatorial effort during the year concentrated on entry of data onto the two main computer databases. Entries totalled 10,330, bringing the number recorded to 14,784 of the department's total of some 129,000 registered specimens.

Data entry on the locality database is now up to date, with 1500 records entered during the year, bringing the total to 2049. Completion of this database has greatly facilitated entries onto the specimen database.

Other curatorial tasks completed during the year involved the registration and computerisation of the 800 specimens in the Melbourne University Geology Department invertebrate fossil type collection, re-organisation and re-labelling of the Victorian and interstate Cambrian and Ordovician shelly faunas as well as re-organisation of the stratigraphic collections from the Lilydale district.

Also completed was the re-organisation of the Australian and foreign Archaeocyatha, sponges, receptaculitids, stromatoporoids and bryozoans. The registration of the foreign bryozoans (about 1000) was updated and all records computerised.

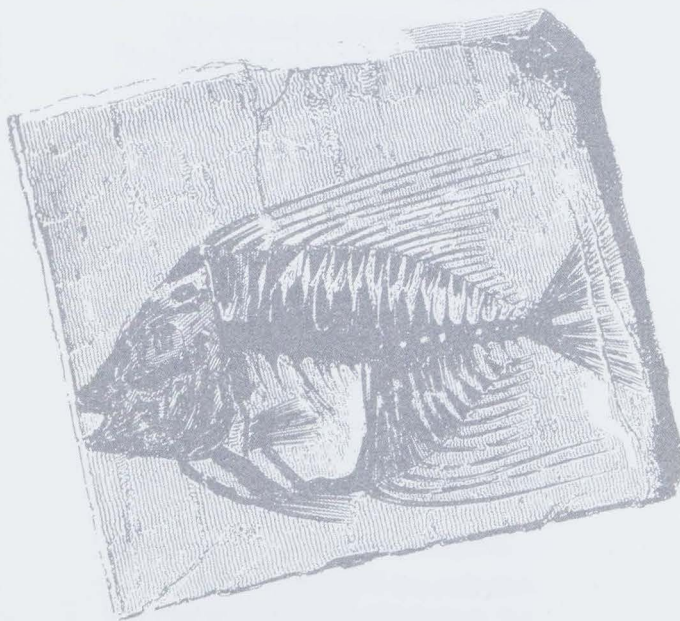

Other tasks largely completed include the re-arrangement and registration of the Victorian and interstate Tertiary echinoids (including a large collection formerly on loan to Professor G. Philip of Sydney University), registration and sorting of the large collection of Tertiary volutes (gastropods) following the publication of Dr Darragh's work on them, in addition to the computerisation of the collection of foreign trilobites.

During the year, 2754 new registrations of specimens were made.

Acquisitions

The most important acquisition this year was material from the Melbourne University collection, comprising more than 800 type and figured invertebrate fossils from the Geology Department. This was the first instalment in the transfer to the Museum of the University's geological collections.

Drs Tom Darragh and David Holloway made collections of Tertiary fossils from Lakes Entrance, Lake Tyers and Timboon as well as Palaeozoic fossils from Buchan and the Tyers district.

Vertebrate Palaeontology

Research

During the year the Department's main research project progressed substantially. The work is a long-term study of vertebrate fossils from the terrestrial Cretaceous deposits of Victoria, a joint project with the Earth Sciences Department of Monash University.

In the summer of 1989, following earlier work from 1984 to 1987, excavations were carried out at Dinosaur Cove, west of Cape Otway. Over three months, from January to March, further tunnelling of the Slippery Rock site resulted in the recovery of more than 1300 specimens, twice the number collected in 1987. The larger area excavated, more than double that of 1987, was made possible through the help of numerous volunteers and supporting organisations.

Over the next few years, the project will continue with a major excavation planned and further collaboration with non-vertebrate palaeontologists to provide a more complete understanding of the context in which the animals lived. The Australian Research Council is contributing to this project.

Another of the Department's long-term projects, completed during the year, involved identification, together with stratigraphic and biogeographic analysis of an assemblage of Miocene mammals from an oil-well core taken in northern Thailand at a depth of almost one kilometre.

The Australian Research Council is also supporting Dr M. Rowley's attempt to sequence collagen from the Museum's collection of fossils from the Miocene Bullock Creek site in the Northern Territory. This investigation, the first of its kind, may provide a method of determining the inter-relationships of totally extinct groups.

Curation

Volunteers continued to curate the collection during the year, registering and re-arranging specimens into consistent order. Nearly 30,000 catalogue entries have been made on the Titan computer system and additional cataloguing is being carried out manually pending the further development of hardware, software, documentation and support.

INVERTEBRATE ZOOLOGY

The four curatorial units in this section manage the State collections of insects, spiders, ticks and mites, crustaceans and all other invertebrate animals from sea and land. The section also conducts invertebrate biological surveys and ecological research.

Marine and Terrestrial Invertebrates

Research

Among research conducted this year were two working papers presented by Dr Chung Cheng Lu to the International Workshop on Cephalopod Systematics and Biogeography at America's George Washington University. The papers have been submitted for publication in the Proceedings of the Workshop.

The visit of Professor Dong Zhengzhi of the Academia Sinica under the Australian Academy of Science/ Academia Sinica Bilateral Science Agreement provided the opportunity to study the biogeographical relationship between the octopus faunas of northern Australia and the South China Sea. Preliminary results show five species occurring in both areas; analysis is continuing.

Analysis of the collection of blue-ringed octopus made in Albany in early 1988 was completed during the year. Results support the validity of placing the species in a separate genus, *Hapalochlaena*. A paper on their developmental stages and anatomical features has been submitted for publication.

In October Dr Tim Stranks participated in a joint research cruise with the Victorian Institute of Marine Sciences on board ORV *Franklin*. The project team studied the benthic, demersal and mesopelagic communities of south-eastern Australian continental slopes. The newly acquired Isaac-Kidd midwater trawl was launched, with good results. Many rare deep-water species were captured in excellent condition. Sorting and analysis of the samples continued.

Ms Sue Boyd completed a review of the superfamily Arcacea as part of the Australian Biological Resources Study's Fauna of Australia project. The compilation of a checklist of southern Australian marine bivalves is continuing.

Curation

Major re-organisation of the collections was undertaken to maximise use of minimal space, to integrate non-marine molluscs with the whole mollusc collection and to amalgamate the previously disparate cephalopod collections. Volunteers helped raise standards in several parts of the collection. Computerisation of records continued with 4000 entries made, including the cephalopod family Sepiidae.

Acquisitions

A total of 37 major accessions were processed, comprising some 1000 lots containing more than 3000 specimens (excluding *Franklin* cruise material). Notable acquisitions were:

- large collections of echinoderms from southern Australia, cephalopods from around Australia and various invertebrates from 38 sampling stations collected on the *Franklin* cruise;
- one specimen of a rare deep-sea creature, the hooked squid *Taningia danae*, 1.2 metres long;
- 30 lots, including holotypes and paratypes of mollusc, lodged by Dr A. Solem of the Field museum of Natural History.

Crustacea

Research

During the year Dr Gary Poore continued research into the systematics of the diverse Australian isopod crustacean fauna, resulting in the recognition of numerous new species which require extensive changes to their higher classification. Dr Jan Just, with an Australian Research Council grant, collaborated on the research, concentrating on the fauna of the south-eastern Australian continental slope. This area has not previously been researched and is revealing a hitherto unknown fauna of several hundred species, more diverse than comparable areas of the world. Three papers from the work were submitted and others will follow.

Dr Poore and Mr Robin Wilson started work on an identification handbook for crustaceans of southern Australia, to replace an outdated work from 1927.

Curation

The transfer of 16,000 records to the Titan database was completed. The collection is now widely representative of southern Australian fauna, with 1445 species in 884 genera and 294 families.

The visit of Dr Alain Crosnier from Paris enabled some of the collection of deep-water shrimps to be identified and registered. Nineteen loans of various taxa were made to specialist taxonomists in the USA, West Germany, France and in other parts of Australia.

Acquisitions

Field work led to significant acquisitions, especially through the *Franklin* cruise, detailed earlier.

Crustacean fauna of the estuary, beaches and shallow offshore waters were studied during two weeks of field work in Mallacoota, a region which had not previously been thoroughly sampled.

Notable additions to the collection included isopods on exchange from the Copenhagen Museum and slaters gathered at Krakatau Island in Indonesia.

Entomology

Research

Dr Arturs Neboiss's research into Trichoptera of the Australian and south-west Pacific area resulted in two revisional studies. One described seven new species of the families Polycentropodidae and Hyalopsychidae from Sulawesi; the other investigated distribution of the *Oecetis reticulata* group in northern Australia, Papua-New Guinea and the south-west Pacific islands, describing new species found in those areas.

A study completed for the Sixth International Symposium on Trichoptera covered anatomical work on adult Trichoptera head structures and the significance of the tentorium in classification and phylogeny.

Mr Ken Walker is undertaking a PhD thesis on the systematics of *Lasioglossum*, a group of native Australian bees. The work covers *Chilalictus* and *Lasioglossum* s. str., two of the nine subgenera of this genus, seeking reliable keys and reference guides to the more than 200 species within the two subgenera, a great potential aid to world-wide research in this area.

Curation

Detailed curatorial work this year focused on a number of areas. Napthalene levels in drawers were monitored and glass tops cleaned to enhance identification without handling. Insects were transferred into the new 'unit-tray' system, a time-consuming task, and new specimens were set into the acquisition or reference collections.

Volunteers offered invaluable assistance in the movement of specimens and checking of identifications. Volunteer J. Greaves helped computerise the author index of the scientific reprint collection and contributed to substantial progress on a cross-referenced generic catalogue of the collection.

Acquisitions

Two major donations were received during the year:

- More than 100 butterflies were given by Mr V. Losmanov through the Soviet Embassy to Mr B. D'Abrera, who received permission to provide the specimens to the Museum;
- About 20,000 freshwater mites were donated by Dr M. Harvey, who was working under an Australian Biological Resources Study grant. The collection, now computer catalogued, is the major Australian representation of this group.

Mr Walker collected native bees on Cape York Peninsula, pinning 8500 of which 2500 were preserved in alcohol. Also gathered were 1000 moths, 1000 caddis flies, 300 lacewings, 200 beetles and 200 other insects such as flies, mantids and wasps.

Environmental Records

Research

Invertebrates of land and sea were studied. In the Victorian Mallee region, identification and analysis continued of material from the 1985–86 collections. A long-term project to monitor the success of the Annuello wildlife corridor was begun. Preliminary fieldwork was undertaken in western Melbourne, with emphasis on the invertebrates of remnant patches of native grasslands. Field and laboratory work continued on the Giant Gippsland Earthworm.

Grant-funded freshwater projects were completed on the production of a key to the genera of Australian water mites, and on the effects of physical disturbance on the Acheron River, a joint project with Monash University. A new two-year freshwater study, the Victorian Stream Communities Project, was begun.

Mr Mark Harvey and Dr Alan Yen completed the manuscript for their book *Worms to Wasps: An Illustrated Guide to Australia's Terrestrial Invertebrates*. The illustrations were funded by a Council grant. The book is to be published by Oxford University Press.

VERTEBRATE ZOOLOGY

The four curatorial units in this section manage the State collections of fishes, snakes, lizards, tortoises, frogs, mammals and birds.

Ichthyology

Research

During the year the production of a comprehensive identification guide to the marine fishes of Australia's south coast, after eight years of preparation, was brought close to completion. The work, due for publication in late 1989, forms part of the South Australian Flora and Fauna Handbooks Series.

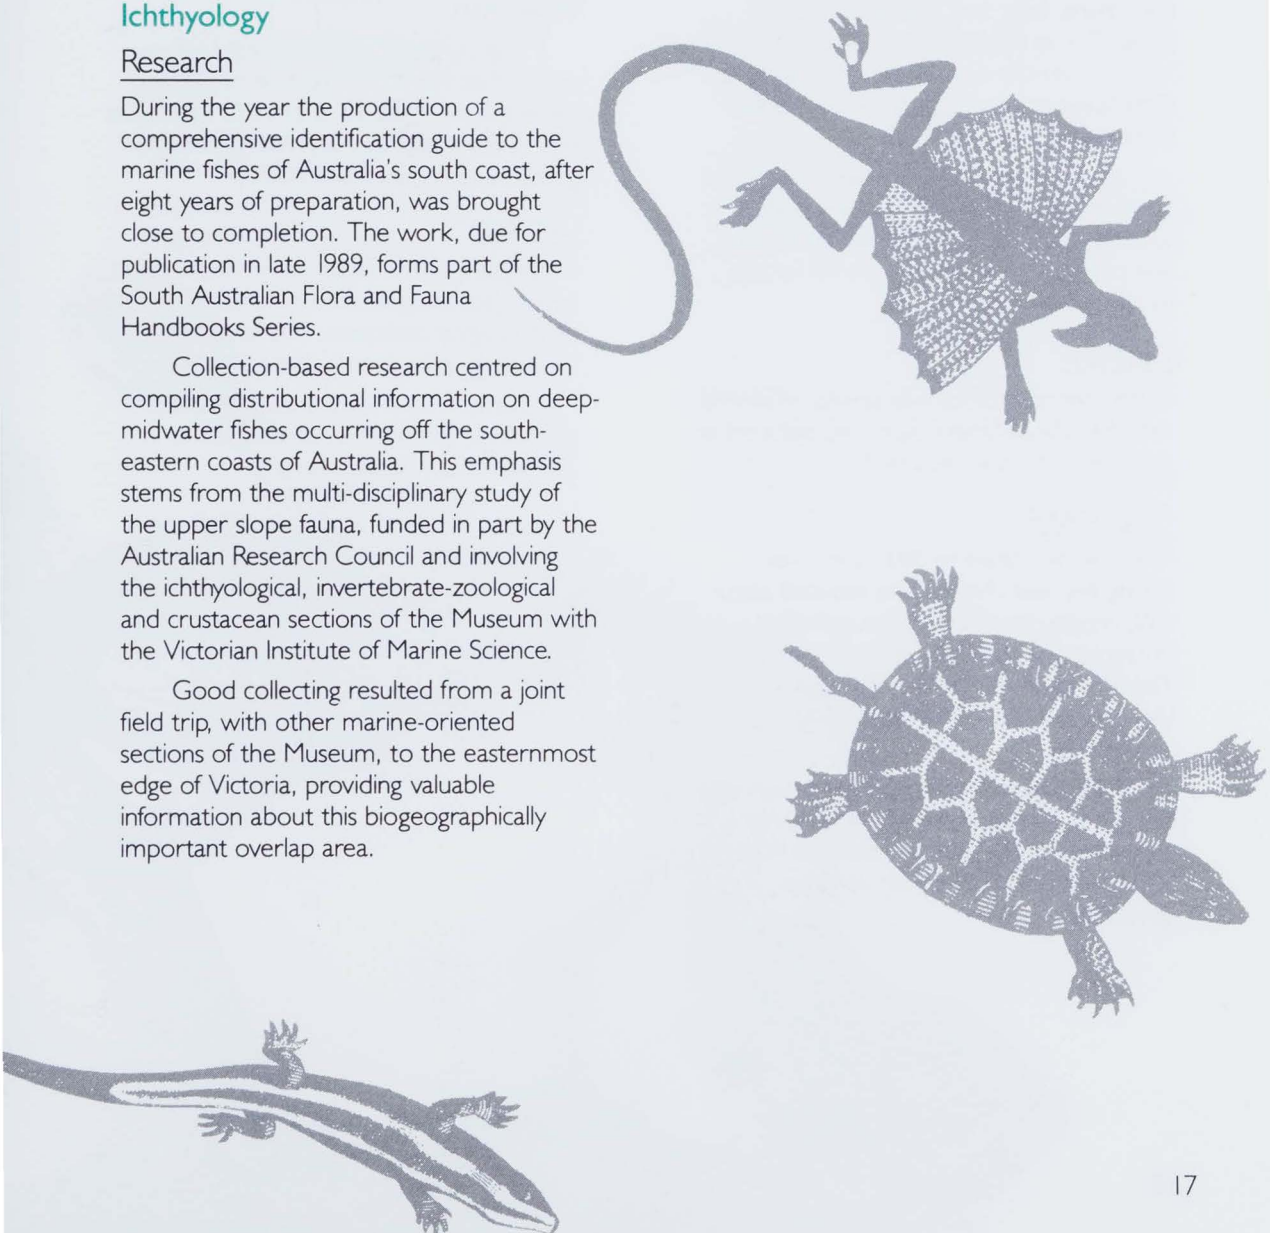

Collection-based research centred on compiling distributional information on deep-midwater fishes occurring off the south-eastern coasts of Australia. This emphasis stems from the multi-disciplinary study of the upper slope fauna, funded in part by the Australian Research Council and involving the ichthyological, invertebrate-zoological and crustacean sections of the Museum with the Victorian Institute of Marine Science.

Good collecting resulted from a joint field trip, with other marine-oriented sections of the Museum, to the easternmost edge of Victoria, providing valuable information about this biogeographically important overlap area.

Curation

Significant progress was made on the computer registration of the collection, with some 2200 entries representing about 17,400 specimens recorded, mainly midwater fishes important for research programs. The recording was assisted by several RMIT students and a temporary employee.

During the year eight loans comprising 505 specimens were sent to Australian institutions and three loans of 22 specimens were sent abroad to leading institutions.

Acquisitions

The collection grew by 500 lots totalling almost 10,000 specimens, most coming from a deep-midwater trip aboard the CSIRO vessel off south-eastern Australia and a land-based expedition to the Mallacoota region to collect subtidal and intertidal fishes.

Herpetology

Research

Survey work on the herpetofauna of north-western Victoria concentrated on Wallpolla Island, west of Mildura, resulting in the collection of the first two Victorian specimens, with data, of the red-naped snake (*Furina diadema*). Other uncommon Victorian species such as the beaked gekko (*Rhychoedura ornata*) and the curl snake (*Suta suta*) were obtained.

An expedition to the Mallee country of South Australia's Eyre Peninsula provided valuable comparisons with Victorian fauna and produced several new species for the Museum's collection.

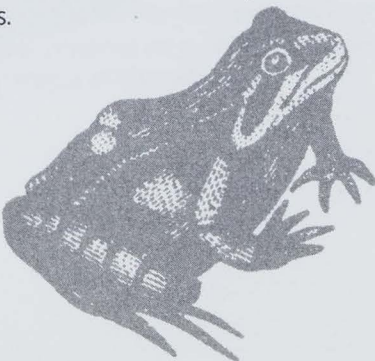

Curation

Computer registration was greatly advanced, with 44,200 specimens, some 60 per cent of the collection, now recorded.

Acquisitions

The collection grew by 3921 specimens during the year. Acquisitions included about 1500 reptiles from the Mallee, collected during Land Conservation Council surveys. The Melbourne University Zoology Department presented about 1000 amphibians.

The most notable single acquisition was a series of eggs and larvae of the rare frog *Megistolotus lignarius* from the Ord River area, a species known from very few specimens.

Ornithology

Research

Dr Leslie Christidis's appointment as visiting fellow at the Australian National University and at the CSIRO Division of Wildlife and Ecology has allowed the continuation of his research on the systematics of the Australo-Papuan birds, using molecular, biochemical and cytogenetic techniques.

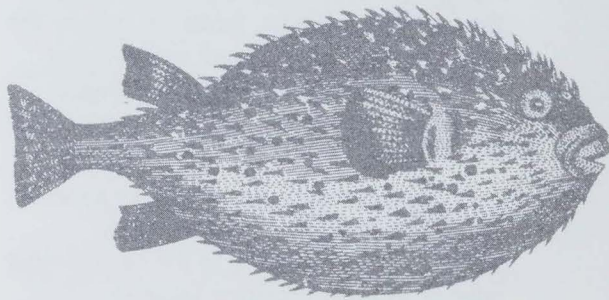

Studies on the evolution and systematics of parrots were completed and work was begun on a three-to-four-year project to examine the origin, systematics and genetic diversity of the Australasian honeyeaters.

The purchase of an ultra-cold freezer means that work can begin on re-housing the extensive tissue bank of 7000 specimens representing 600 species, making possible genetic and evolutionary studies.

Curation

Cataloguing of the Australian skin collection began, facilitating the computerisation of the ornithological databases. The large H.L. White egg collection was catalogued.

Some 175 skins were prepared and preliminary preparation undertaken on 248 specimens for skeletons.

Acquisitions

Of the total of 285 bird specimens received, the most significant were:

- 86 specimens collected by Museum staff around Victoria for electrophoretic studies and for skins and skeletons for the research collection;
- 9 specimens on exchange from Queen Victoria Museum, Launceston;
- 43 specimens from the Department of Conservation, Forests and Lands;
- 6 specimens from Sir Colin MacKenzie Fauna Park, Healesville;
- 5 skins on exchange from Ville du Havre Musee d'Histoire Naturelle, France;
- 24 skins from the Bird Observers Club of Australia;
- 5 skeletons from the National Museum of New Zealand.

Mammalogy

Research

Several projects completed during the year are being published, including *The History of Australian Mammalogy*, Volume 2 of *The International History of Mammalogy*, and a paper on Gould's wattled bat, to appear in the French journal *Mammalia*.

A short paper on the spotted dolphin was completed and work continues on revision of this species in Australasian waters. An account of Donald Thomson's Victorian mammal collection was published.

Research into tissues of dasyurid and thylacine specimens was undertaken by Dr D. Oberndorf, veterinary pathologist, seeking parasites.

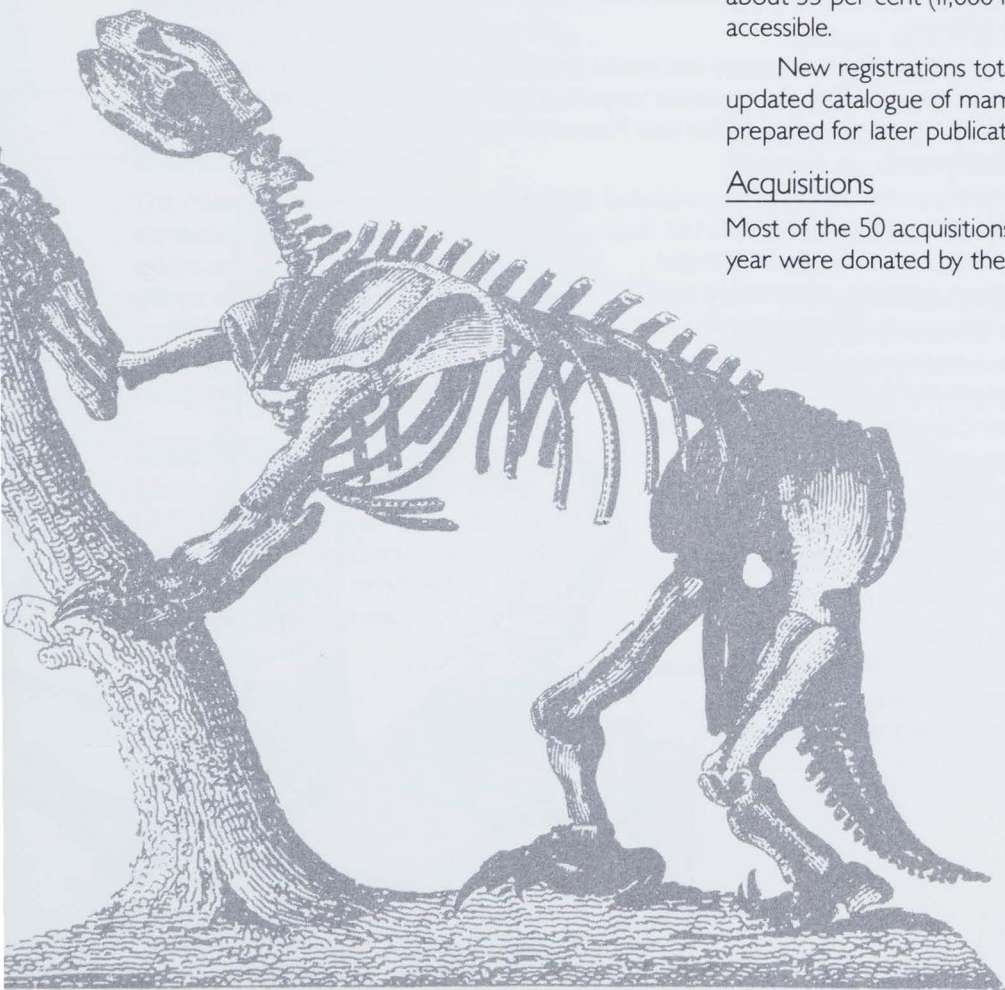

Curation

Considerable progress was made on editing records for the computerised database, with about 33 per cent (11,000 records) now accessible.

New registrations totalled 318 and an updated catalogue of mammals has been prepared for later publication.

Acquisitions

Most of the 50 acquisitions made during the year were donated by the public.

DIVISION OF PUBLIC PROGRAMS

This year the Division proudly presented international exhibitions of great cultural value, enabling hundreds of thousands of Victorians to see and appreciate treasures from the world's ancient civilisations.

As the Museum's contribution to the Bicentennial exhibition program, *Ancient Macedonia* and *Gold of the Pharaohs* were presented, with official state visits by the President of Greece, His Excellency Mr Christos Sartzetakis, and Egypt's Minister for Supply and Internal Trade, Dr Galal Abul-Dahab.

The Museum also organised *Shipwreck!*, an exhibition of archaeological material from ships lost off the east and west coasts of Australia, which later toured Australia and visited The Netherlands.

These exhibitions drew enthusiastic audiences and contributed greatly to the Museum's standing as host and organiser of major national and international exhibition exchanges.

Following the successful negotiation of these displays, the Victorian Government funded the installation of air-conditioning throughout the Museum's Swinburne Gallery, providing the climate-controlled environment essential for future touring exhibitions.

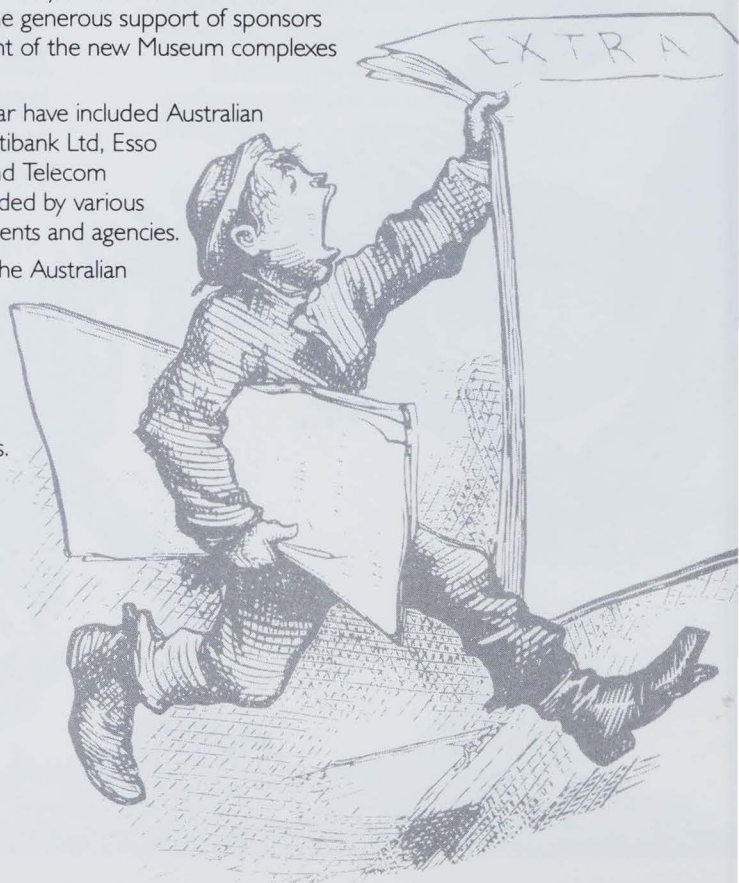

The permanent displays were developed during the year, with new electronic systems installed.

Special educational programs for visitors have been developed to complement touring and permanent exhibitions, including highly successful outreach activities.

Parallel with greatly increased community and media interest in Museum activities has been growth in the generous support of sponsors as enthusiasm builds for the development of the new Museum complexes at Southbank and Spotswood.

Valued supporters over the past year have included Australian Airlines, the Australian Wheat Board, Citibank Ltd, Esso Australia Ltd, OTC, Singapore Airlines and Telecom Australia, with significant assistance provided by various Federal and State Government departments and agencies.

The Museum worked closely with the Australian Bicentennial Authority and the International Cultural Corporation of Australia on major exhibitions in 1988/89, helping consolidate and expand the Museum's productive relationships with national and international colleagues.

New installations

A highly significant development during the year was the establishment of an additional permanent Aboriginal exhibition, *Koorie*, opened by Auntie Connie Hart, an Elder from the Gunditjmara Tribe, on 16 December 1988.

The display was developed and installed by a team co-ordinated by Mr Jim Berg, Executive Director of the Victorian Aboriginal Cultural Heritage Trust, with the involvement of many Aboriginal people together with Museum staff and volunteers.

Koorie offers rich insights into Aboriginal life from Dreaming times to recent days, displaying significant cultural material and confronting the realities of black/white relationships over the past 200 years, including contemporary issues such as land-rights campaigns.

Other important new installations included a platypus diorama which incorporates a videotape film of monotremes in their natural habitat. The display was made possible by the valuable assistance of the Friends of the Museum.

Education Service Section

The Museum Education Service extended appreciation of permanent and temporary exhibitions by providing teachers and school groups with educational programs and materials, especially for the major displays, *Shipwreck*, *Artworks*, *Gold of the Pharaohs*, *Voices and Visions* and *Looks Phoney*.

Spotswood

Education staff worked closely with the Division of Science and Technology in planning for the Spotswood development, surveying education needs within the evolving exhibition briefs.

Training

Professional development courses for educators and student teachers were offered in various subject areas including science, history, biology and physics, with papers presented at seminars run in association with professional conferences.

Workshops were developed for teachers of Australian studies, geology and environmental education and more than 100 teacher groups attended Museum in-service courses in addition to a series of visits by students from the main teacher-training colleges.

Community Services Section

During the year the section continued and developed programs to inform and involve the community and special groups in the Museum's permanent and temporary exhibitions, especially through volunteer guides, tours, lectures, special activities and the Outreach Program.

Significant aspects of this important work included making special arrangements for physically disadvantaged and non-English-speaking groups to visit *Gold of the Pharaohs*, for which guides were available seven days a week and special activities were held each weekend and during school holiday periods.

The section also arranged Greek music and dance performances in conjunction with *Ancient Macedonia*, and during *Shipwreck*, officers from HMAS *Cerberus* acted as guides to the display.

The Community Services Section arranged participation in community events such as Moomba, Children's Week, National Aboriginal Heritage Week and Bird Week, extending the Museum's role in Victorian life.

In many of these activities the work of volunteers is vital to success and the section would like to thank the many enthusiastic participants for their valuable work.

Museum Outreach Program

The Outreach Program continued to be a popular and important aspect of the year's activities, presenting selections from the Museum's collections to people otherwise denied access through such factors as age, distance or disability.

This financial year 7429 people from 271 groups participated in Outreach Program activities; by May 1989 the program was fully booked for the remainder of the year.

Sponsorship

Esso Australia Ltd provided a grant of \$40,000 to underwrite salary costs, vehicle purchase and resource development over two years.

Special events

Several significant events were organised during the year as part of the Outreach Program.

On National Aborigines and Islanders Observance Day, more than 1000 children participated in an educational program at Blackburn Lakes Sanctuary, traditional territory of the Wurundjeri people.

Children's Week activities were held with the co-operation of Museum Education staff and Werribee City Council, and the Outreach Program represented the Museum at Springvale Senior Citizens Expo.

Holiday programs

Twenty sessions at municipal libraries were held for family groups, an increasingly popular aspect of the Outreach Program.

Rural programs

Bookings in rural areas grew to 20 per cent of the total inquiry, with the Westernport region targeted in a five-year information campaign on the Outreach Program extending through rural areas. Visits were also made to Timboon, Camperdown, Macedon, Gisbourne, Apollo Bay and Aireys Inlet.

Public Relations

With the appointment early in 1989 of a Public Relations Officer, the Museum's profile in the community has been significantly raised, enhancing the community's awareness of programs and consequently increasing public participation.

Professional promotion of the *Gold of the Pharaohs* exhibition drew wide media coverage and a total attendance of some 260,000. Expert lectures were arranged during the display, deepening understanding of an exceptional exhibition.

The Public Relations Branch maintains continuing good rapport with the media and answers a growing number of inquiries from the public about exhibits and programs. The Branch assists other departments within the Museum in the preparation of publications, in addition to arranging hospitality and Museum tours for visiting dignitaries.

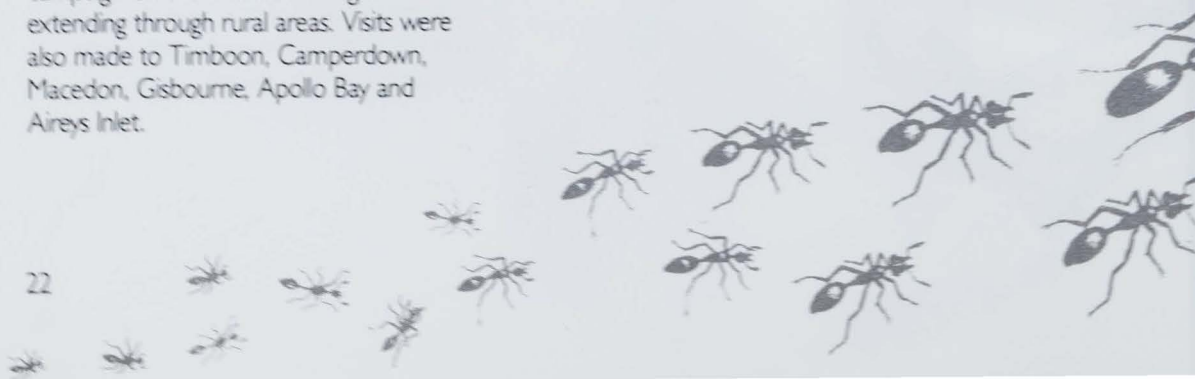

The Branch will continue to inform the public of the exciting developments under way or in preparation as the Museum moves to new sites under the rebuilding program.

Commercial Operations

Commercial Operations continued during the year to be a major source of revenue for the Museum.

The two book and souvenir outlets were operated by the Museum until 30 November 1988, then leased to an independent operator.

The coffee shop and cafeteria were leased to a caterer and the Museum continues to provide photographic services on a commercial basis.

Museum Resource Service

The Museum Resource Service provided exhibition production, installation and maintenance skills on a wide range of temporary and permanent exhibitions during the year.

One of the most important was the new, permanent *Koorie* display, which demonstrates the Museum Resource Service's range of specialised abilities.

Construction Workshop

The workshop's year comprised erection and dismantling of a number of temporary exhibitions, in addition to the essential, continuing maintenance and repair work undertaken throughout the Museum.

The major construction project this year was the *Koorie* exhibition, designed and built as a permanent installation.

Technical Workshop

Workshop staff undertook many aspects of exhibition installation and maintenance during the year, including the provision of light and power services for temporary and permanent displays as well as travelling shows.

Minor works were carried out for all Museum departments and audio-visual equipment supplied and maintained as required.

The workshop made two silver plough trophies for presentation at the National Ploughing Competition.

Photography Section

The section provides photographic services to Museum departments and supplies photographic works and services to other institutions and to the community.

In a productive year, the section provided \$380,000 worth of internal services and grossed \$112,500 in external sales and services.

Lectures on photography were arranged. In September 1988, photographer Rodney Start gave a talk and demonstration to art students at Bendigo CAE, and from July to November 1988 the Manager, Frank Coffa, addressed students at Preston College of TAFE on technical, scientific and natural history photography.

Preparators Section

The section co-ordinated the transport, installation and dismantling of travelling exhibitions such as *First Impressions*, *Shipwreck*, *Ancient Macedonia* and *Gold of the Pharaohs*.

Much effort was devoted to innovative aspects of the *Koorie* exhibition, for example the creation of a large diorama depicting a village and fish-trap site in western Victoria, with the valuable assistance of volunteers.

The Victorian Aboriginal Cultural Heritage Trust supported the development of a number of exhibitions and the Preparators Section was involved with the Aboriginal Access Program, training two people to mould and cast artefacts for the Museum and its Outreach Program.

Regular maintenance and preparation continued throughout the year, with special projects including a new formicarium for the introduction of an ant colony.

Field trips for collecting and preparation of material were undertaken in various parts of the State.

Tsintaosarus was assembled and preparations begun for a new dinosaur exhibition, with a start being made on the moulding of *Camptosaurus* to make a cast specimen.

Design Section

The design section this year focused on the achievement of excellence in the preparation and presentation of *Koorie*, the Museum's important new development in the evocation of Aboriginal life from ancient to present times.

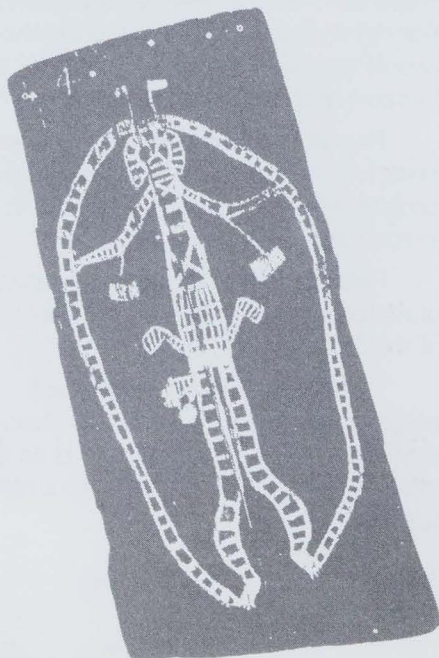

Major exhibitions were designed, including *Gold of the Pharaohs* and the main Bicentennial displays, with additional attention given to the presentation of travelling shows.

The Design Section also provided consulting services within the Museum and to external clients and the community. Conceptual design was completed for the Childers Gallery refurbishment and the section is supervising fitout to specifications.

Graphic design was provided for a variety of Museum projects. Concept proposals were undertaken for gallery refurbishment and a new signage program.

The Design Section received a number of visitors during the year, including the Victorian Minister for the Arts, Mr Evan Walker, the Design Project Manager at Sydney's Powerhouse Museum, Mr Brad Baker, and the Senior Designer at the Australian Museum, Mr Rob Joyner, accompanied by members of his staff.

The section arranged a lecture to students from Melbourne State College.

EXHIBITIONS 1988/89

Another Day, Another Dollar

Bindon Hall, March 88 to February 89.

Australian Council of Trade Unions.

On the history of working life. Opened by ACTU President Mr Simon Crean.

Sponsored by Australian Airlines, Brambles and Australian Paper Manufacturers.

School of the Future, Sunrise School

North Rotunda, June 88.

Joint project with the Australian Council for Educational Research.

Dinosaurs

Queen Victoria Museum and Art Gallery, Launceston, June 88.

Exhibition of dinosaurs from Australia, Canada and China, which also travelled to Auckland Museum, New Zealand.

Cranbourne Meteorite

Shire of Cranbourne, June 88.

With the Shire Council, the Museum prepared a small exhibition of meteorite castings for display at the Shire offices.

Salt of the Earth

The Museum's educational display on salinity travelled throughout regional Victoria from June 88 to May 89.

Passing Time

Barry Hall, permanent display.

Presenting a chronology of time-measurement devices.

Bark Paintings

September 88 to June 89.

Temporary display of bark paintings from northern Australia, funded by the Spoleto Arts Festival.

Voices and Visions

Barry Hall, August 88 to February 89.

Telecom-sponsored display of future communications.

Artwork Exhibition

Thorpe Gallery, June to August 88.

Ten artists from the Victorian Arts Workshop made banners commissioned by various trade unions.

Shipwreck!

McCoy Hall, August 88.

The story of European discovery of Australia told through objects recovered from underwater wrecks of British and Dutch ships.

Presented by the Australian Bicentennial Authority in association with the International Cultural Corporation of Australia Ltd, supported by Australian Airlines and sponsored by ABN Australia, Australian National Line, Amro Australia, Heineken Australia, Holdhuys Vic. Pty Ltd, KLM Royal Dutch Airlines, Nedlloyd Australia, Philips Holdings Industries, Royal Nedlloyd Groep NV and Seabridge Australia, with additional funds from the Australian National Maritime Museum.

The display was shown throughout Australia and in the Netherlands.

Ancient Macedonia

McCoy Hall, November 88 to February 89.

An exhibition of Greek antiquities, the Bicentennial gift to Australia of the Government of Greece. Sponsored by OTC, funded by the Australian Bicentennial Authority and carried by Olympic Airways and Australian Airlines.

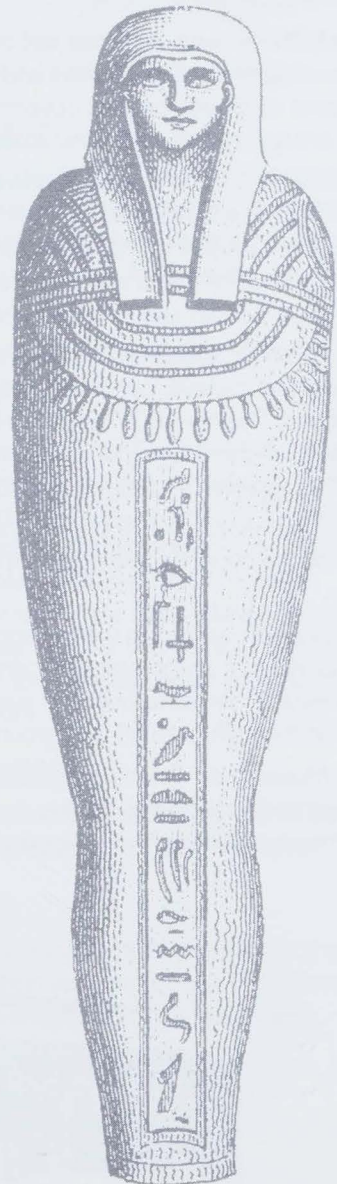

The exhibition, organised by the Museum of Victoria in association with the International Cultural Corporation of Australia Ltd, was also shown in Sydney, Brisbane and Adelaide.

Gold of the Pharaohs

Bindon and Swinburne Halls, March to July 89.

An exceptional exhibition of gold artefacts from the tombs of the Pharaohs, loaned as a Bicentennial gesture of good will by the Government of Egypt. Organised by the Museum of Victoria, made possible by the Australian Wheat Board, sponsored by Singapore Airlines and Australian Airlines and presented by the Bank of America.

The exhibition was a major cultural event. It also travelled to Brisbane, Perth and Sydney under the auspices of the International Cultural Corporation of Australia Ltd.

The Spotswood Project

In August 1988, the Victorian Treasurer, Mr Rob Jolly, formally announced the development of the Spotswood Centre as the new home for the Division of Science and Technology following a year of intensive planning by the Museum's Council and staff.

During the year the Museum stepped up investigatory studies into community participation, fund-raising, collection management and exhibition master-planning for Spotswood.

The Centre will be housed at the former MMBW Pumping Station in a new building which integrates with the industrial environment and historic structures, providing for an ultimate annual audience of 600,000.

Spotswood will raise public awareness of the role of science and technology, past and present, forging strong links with the community, industry, schools and universities as well as special-interest groups. The distinguishing qualities of the Centre will be flexibility and responsiveness to visitor requirements.

Initially the schools audience will be targeted during weekdays, with the focus on family groups at weekends. The Division is developing some 20 programs to meet demand, covering the history of technology in Victoria; energy; communications; materials and mining; and inventions.

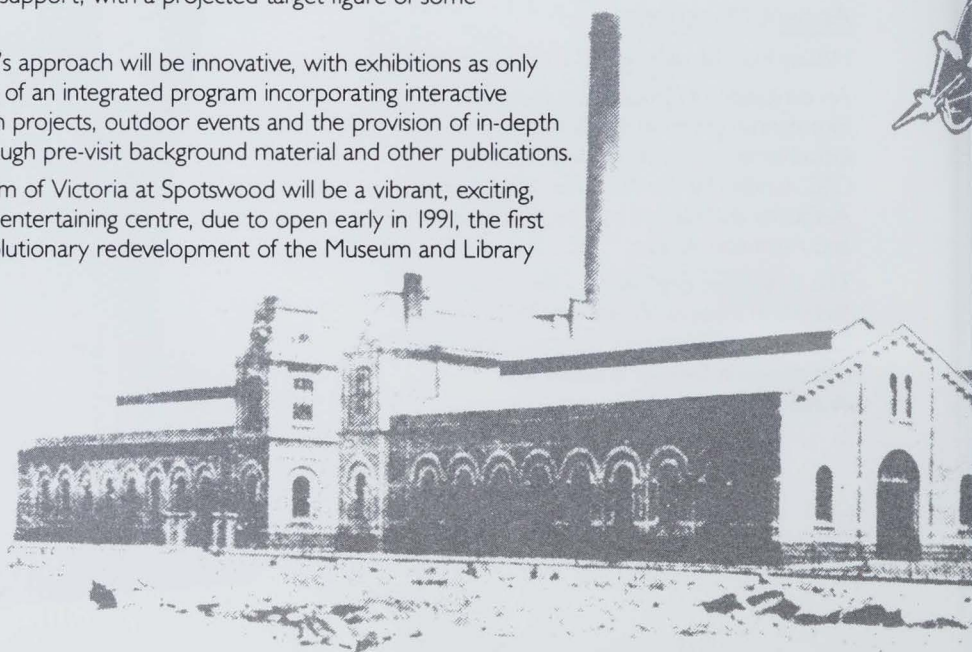

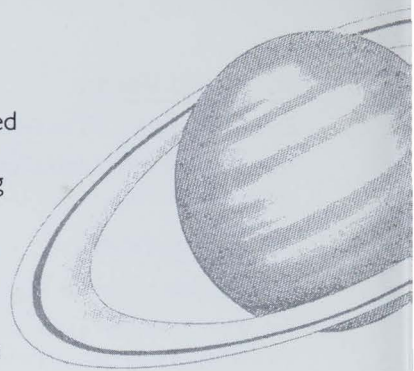

Professional consultants have advised the Museum on program design for the new building as well as marketing, collection management, visitor services, project management and on the most effective ways of meeting community needs and the requirements of special-interest groups.

The move to Spotswood provides the Division with the opportunity to re-assess the massive, continuing task of collection conservation and management. The new EDP system is assisting curatorial and registration staff to prepare the collection, and storage consultants Hendersons have prepared an analysis of requirements for the Spotswood fitout.

Thorough research into potential sponsorship has indicated a high level of industry support, with a projected target figure of some \$7 million.

Spotswood's approach will be innovative, with exhibitions as only one component of an integrated program incorporating interactive displays, research projects, outdoor events and the provision of in-depth information through pre-visit background material and other publications.

The Museum of Victoria at Spotswood will be a vibrant, exciting, educational and entertaining centre, due to open early in 1991, the first stage in the revolutionary redevelopment of the Museum and Library complex.

Administration

The first stage of the Museum's new computing system was installed in the Division this year, providing greatly enhanced access to collection information and facilitating better management of resources.

Four staff members joined the Division this year: Research Officer Ruth Lane, Research Assistant Geoffrey Compton, Word Processing Officer Linda Cook and Technical Assistant Jeremy Steel.

The management structure of the Division was streamlined, with separate responsibilities allocated for collections and public programs and detailed planning programs established for the care and development of existing collections as well as preparing for the Spotswood project.

Significant collection management projects included cleaning Barry Hall for new Telecom-sponsored exhibitions, re-organising the Division's store, cleaning McArthur Basement to accommodate material for the Spotswood project and preparation of an inventory of moveable items in the Spotswood Pumping Station so that items at risk could be relocated.

Arms and Armour

The Honorary Curator, Major Ted Millett, provided valuable additional service to the Museum as acting curator until the appointment of the full-time Curator, Major R.S. 'Bill' Billett, on 1 February 1989.

Acquisitions

Important additions to the collection during the year included:

- One Japanese Imperial Navy dirk, donated by Mr W. Kerfeld;
- One Belgian .410 single-barrel shotgun, donated by Mr R. Young;
- The White Ensign and Battle Flag flown by HMAS *Perth* in the Mediterranean during 1941, donated by the HMAS *Perth* Association.

Research

Work began on a listing of the guns in Victoria with the aim of locating the maximum number which came into the State before Federation.

Identification was carried out for the curatorial staff of Werribee Park.

Visits

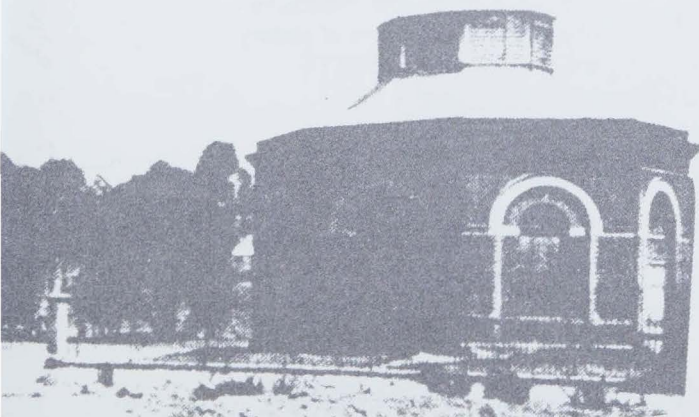

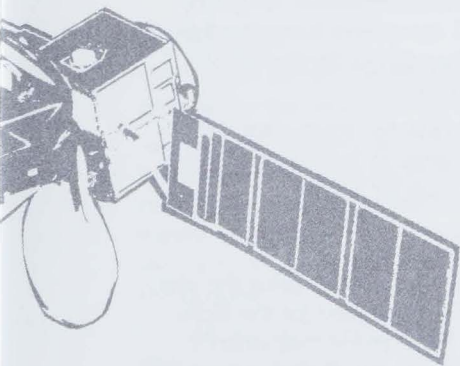

In April 1989 the Curator visited the Tower of London and its new outpost, Fort Nelson at Portsdown, in addition to the Wallace Collection, the National Army Museum Chelsea, the Royal Navy Museum Portsmouth, the Royal Marines Museum at Eastney and the Mary Rose. Visits were also made to Berkeley Castle and the Jenner Museum.

Donations

Mr David Alexander donated \$1000 for the arms and armour collection fund.

Policy

The development of policies for the collection was begun, the first priority being the oversight of conservation and maintenance.

Department of Astronomy

H.V. McKay Melbourne Planetarium

The Planetarium had a highly successful year. Programmes drew more visitors and two shows were sent abroad.

Attendances totalled 88,892, up 10 per cent on 1987/88. The exhibitions presented were *Discover the Southern Cross*, *The Star of Bethlehem*, *Three Minutes to Mercury* and *The Sights and Sounds of Space*.

Discover the Southern Cross, our Bicentennial display, was highly commended in the national Museum of the Year Awards.

The Planetarium in Armagh, Northern Ireland, showed *Discover the Southern Cross* and *Dinosaurs and the Death Star* in honour of Australia's Bicentenary.

Public viewing programs at the Old Melbourne Observatory were booked out, drawing 1191 to a total of 92 sessions presented by Astronomical Society of Victoria volunteers.

Dr Robin Hirst and his staff fielded numerous public inquiries relating to astronomical phenomena.

Department of Communications, Electronics and Medicine

Donations and acquisitions

Among a number of important donations to the collection during the year was a CSIRO Mass Spectrometer, built in 1952, provided by the organisation's Materials Science Division.

The unit was almost certainly the first large mass spectrometer in Australia, largely responsible for the high standard of mass spectrometric work in the 1950s and 1960s.

Other valuable acquisitions included an early anaesthesia unit (donated by G. and D. Beaves), a Hubbard 'E' Meter, Model VI (J. Lutton), power generation measuring equipment (State Electricity Commission), a 1965 AWA transistorised TV set (D. Dowe), a 'Reservator' hotel booking device (Joan Roxburgh), a dental chair (Anatomy Department, University of Melbourne), a QYX electric typewriter and word processor, circa 1978 (Mr Finch), and a leg prosthesis (Major R. Billett).

Loans

From the Museum's extensive Telegraphy Collections, 25 items were loaned to the OTC for the Bicentennial *Settlement to Satellites* exhibition.

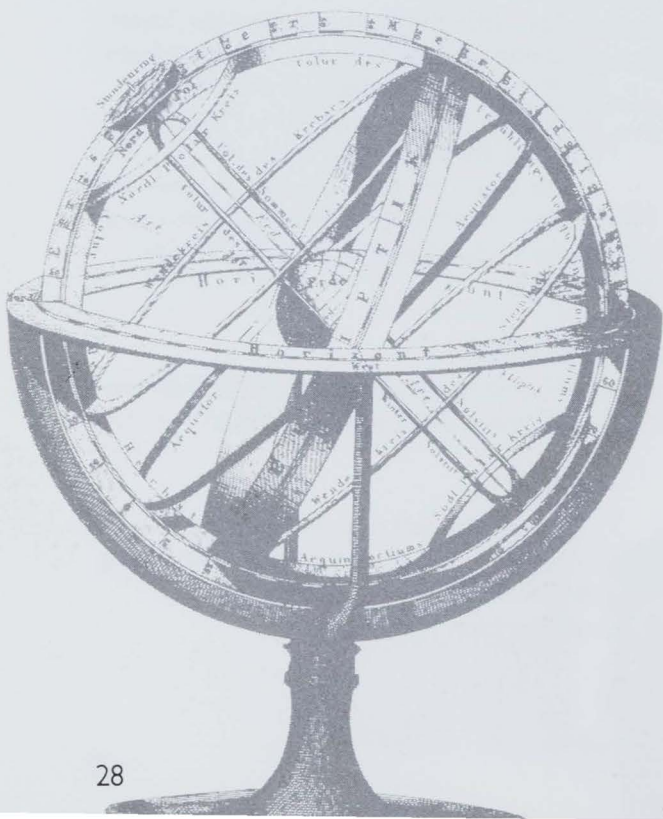

The Max Howden short-wave radio receiver was loaned to the Moorabbin and District Radio Club for display.

Consultancies

Funding was made available during the year from the L.J. Smith Bequest for the Bionic Ear project, a Museum initiative which is being undertaken by the Australian Science Archives Project within Melbourne University's Department of History and Philosophy of Science.

Planning

The Curator of Medicine and Communications was actively involved in the Spotswood Planning Project during the year, leading a group working on the development of innovative future programs.

Department of Engineering and Transport

The principal activities of the department centred on the Spotswood Museum development with special emphasis on the Pumping Station programs and associated engineering services. Numerous offers of professional assistance have been received for proposed live steam operations.

Acquisitions (major items only)

Purchases:

- Alan Goode model railway system;
- Lilienthal glider (replica);
- Grocke boiler;
- Lugton steam engine.

Donations:

- Pritchard steam engine by Pritchard Steam Power Pty Ltd;
- Lugton boiler c. 1913 by Telecom Australia;
- Water lift from Hotel Australia by Citicorp;
- Maxitherm boiler by Department of Corrective Services (Pentridge).

Conservation

The Duigan aircraft was inspected and assessed by the Senior Conservator.

A Super Sentinel steam truck bequeathed to the Museum is being restored to operating condition by Mr Ben Klaster of Hampton Park in exchange for all the parts of a second Sentinel included in the bequest.

All aircraft engines were cleaned and covered.

Steam Heritage Survey

The major activity of the Department involved a State-wide survey of Victorian steam heritage.

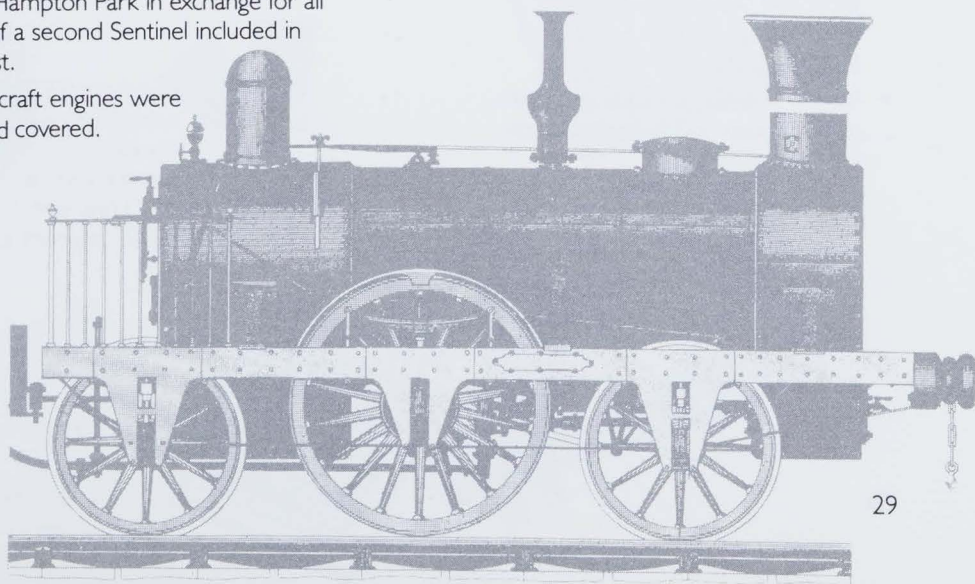

Matthew Churchward, an engineer with experience in historical inquiry, was appointed Research Officer in February 1989 to undertake a study of the use of steam power in Victorian industries and to establish a register of early steam engines still extant.

The Survey is a jointly funded project established by the Museum with the Victorian Division of the National Trust of Australia.

To date the survey has covered 457 engines, some two-thirds of which have been fully recorded, measured and photographed, a large number of them of Victorian manufacture. Many more of the estimated 2000 steam engines still in existence will be recorded before the completion of the survey.

The project is under the direction of the Curator with Dr Peter Milner, representing the National Trust Industrial History Committee.

Dr Milner has also co-ordinated support from teams of undergraduates from the Department of Mechanical Engineering, University of Melbourne.

Research assistance

Mr Geoffrey Compton provided valuable assistance in updating the collection database during the Curator's long-service leave.

Visitors

Mr Barry Hall, Sovereign Hill, Ballarat;
Mr Ross Goodman and Mr Kerry Ward, Powerhouse Museum, Sydney;
Mr Alan Chamberlain, former Council member, Science Museum of Victoria;
Mr Jack Johnston;
Mr Neville Govett;
Mr Ken McInnes, Institution of Engineers, Australia.

Volunteer service

Mr Wally Vears provided considerable assistance with conservation of the aircraft engine collection, the Willans engine and the Spotswood pumping engines.

Special events

The curator co-ordinated several promotional activities:

- Address by Dr Neil Cossons, Director, Science Museum, London, to engineers and staff at the Spotswood Pumping Station;
- Excursion by Friends of the Museum on the *Flying Scotsman* to Seymour;
- Excursion by Friends of the Museum to the *Wattle* through the Port of Melbourne and later to the Amecon Dockyard (Alfred graving dock), Williamstown and the Spotswood Pumping Station;
- Visit by Veteran Car Club members to the Spotswood Pumping Station.

Committees

The curator is a member of:

- The National Trust of Australia (Victoria), Industrial History Committee (Chairman);
- Steering Committee, Newport Workshops Heritage survey by V/Line;
- Steering Committee, Spotswood Ways and Works Transport Museum Feasibility Study by V-Line.

Award

The RMIT Council presented the Curator with a Centenary Award medal in recognition of services to the Institute.

Department of Numismatics

The year was highly significant for Numismatics, with the establishment of the Museum of Victoria Numismatic Trust Fund and the Spink (Australia) Numismatic Trust Fund, which will both contribute substantially to the development of the collection.

The Museum Trust (\$340,000 plus \$27,000 working capital) funded acquisitions this year and the Spink Trust (\$20,000) will begin full operation next financial year.

Donations

Some 2500 pieces were added this year. The key donations included:

- Proof and working strikes 1988, donated by the Royal Australian Mint;
- Trial strike of Holey Dollar and Dump plus proof striking of 1988 gold 1 oz (GoldCorp Australia);
- Family collection of coins and medals begun in the 19th century (Robert Edwards);
- Company scrip, 450 pieces (R. Hearn);
- Coin collection of Sir John McIntyre (J. McIntyre);
- Tokens (Ian Armstrong, a long-standing donor);
- Coins (R. Jewell);
- Medals (Dr Phillip Law, who earlier donated his collection of awards);
- 1988 Canadian proof set (W. Maxwell)

Acquisitions

Ancient material added to the collection included tetradrachms from Macedon and Egypt and two Roman denarii.

Australian acquisitions were three half-sovereigns from the Sydney mint, completing the Museum's holdings of that coin from the reign of George V, plus Co-operative Society tokens and a number of 19th century medals.

Among world coins acquired were a rare New Zealand proof set and an Afghan rupee of 1886.

Visitors

Among visitors received during the year were W. Sheehan, Controller of the Royal Australian Mint, Dr K. Sheedy, Curator of Numismatics at the Mint and Barracks Museum in Sydney and D. Owen, Numismatics Manager, GoldCorp, Perth.

Loans

The Museum loaned material this year to the Australian National Gallery in Canberra and the South Australian Migration Museum.

Exhibition

A successful display of medals relating to Queen Victoria was mounted with the generous assistance of Mrs Eva Hardy.

Activities

During a busy year, the Curator was judge at the Victorian Council of Numismatic Societies 1989 convention, edited the *Journal of the Numismatic Association of Australia* and was an examiner in Greek and Roman history.

Philatelic collection

The Ivey and Cyril Dansen Bequest, the first major addition to the Museum's philatelic holdings since the 1930s, enlarged the collection by more than 20,000 stamps, including significant material from the reigns of Georges V and VI and Elizabeth II.

Department of Photography and Cinematography

The Photographic Archive Project continued to be of central importance during the year, providing educational and cultural institutions around Australia with access to invaluable resource and research material.

Among activities undertaken within the project were consulting with the City of Ballarat on an architectural heritage collection of photographs as well as mounting a successful exhibition at the Mildura Arts Centre.

The book *Mum and Dad Made History*, produced from the Museum's archive with text by Chris McConville, was launched and more than 3000 copies have been sold.

The Victorian Government's gift to the nation's new Parliament House comprised 150 photographs from the archive, complementing earlier photographic material from the Museum already held in Canberra's Parliament House collection.

The project's interactive video disc system was displayed at the first National Optical Disc Conference held in Melbourne in June 1989.

During the year work began on the H.V. McKay archive with the copying of the Guard Books of Massey-Ferguson, a complete photographic record of the company's development.

Sponsorship

The Bendigo Building Society continued their valuable support of the Photographic Archive Project and underwrote the publication of *Mum and Dad Made History* with a contribution of \$50,000, returnable from book sales.

The Sunshine Foundation gave \$8000 for the Massey-Ferguson project, Canon Australia donated computer equipment and Kodak Australasia provided film for the Horsham project.

Lectures

Staff gave lectures at the Department of Museum Studies, Victoria College, and at a forum organised by the Victorian Centre for Photography.

Department of Rural Science

Significant developments during the year included the promotion of the Curator of Rural Science, Martin Hallett, who became Senior Curator, Science and Technology, with responsibilities for collections throughout the Division of Science and Technology, and the appointment of Roger Cummins as Assistant Curator, Rural Science.

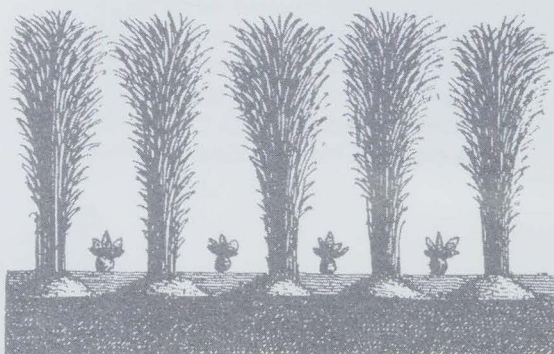

A successful temporary exhibition in January 1989 displayed barbed wires and fencing tools from the collection of Jack Chisholm of Swan Hill, with high media interest in the show.

Lake Goldsmith Steam and General Engineering undertook extensive restoration of the Museum's Cowley Steam Traction Engine, made possible by funding from a special Ministry grant.

The Senior Curator continued to serve on the Board of Swan Hill Pioneer Settlement, helping develop future plans for the site. With the Curator of Photography, a record was made of Sanderson's steam sawmill at Ballarat.

Exhibitions

Successful displays included two exhibitions of the Sunshine tractor built by H.V. McKay, at the Ballarat Show and at Echuca.

Research

An entry in the *Australian Dictionary of Biography* resulted from research into the life and work of H.S. Taylor, inventor of the Sunshine header harvester.

Papers on the Rural Science Collection and the Sunshine tractor were presented to the Bicentennial Conference on Agricultural Engineering sponsored by the Institute of Engineers, Australia.

Research into the Cowley engine continued as restoration proceeded, ensuring historically accurate results.

Richard Aitken, the Museum's Science and Humanities Scholar for 1988/89, inquired into the Division's mining models, shedding much light on their provenance and significance.

Acquisitions

Material added to the collections during the year included a wheat measuring device, a lead whistle, a cherry butterworker, a Daniel Harvey plough, agricultural models by Pat O'Neal, two lopping boards, three agricultural signs, an early travelling sprinkler and wire samples.

Also acquired were agricultural trade literature from companies and private donors and material relating to the Cowley engine.

Conservation

Satisfactory progress was reported on the Cowley engine restoration, with further funding recommended to enable completion of rebuilding before the opening of Spotswood in 1991.

Restoration of the Sentinel steam waggon is to be carried out by Ben Klaster of the Melbourne Steam Traction Engine Club under an arrangement approved during the year by Council.

Sponsorships

As part of a sponsorship arrangement, Maxitherm Boilers Pty Ltd have generously agreed to recondition a boiler to run the engines at Spotswood Pumping Station. This sponsorship will add substantially to activating the Spotswood site and will greatly increase visitors' enjoyment of the historic pumphouse.

Lectures

The Senior Curator gave two lectures to Museum Studies students on the information role of museums and the part played by computers in managing collections and also lectured to Melbourne University agricultural engineering students on technological change in rural industry.

The Assistant Curator lectured to American visitors on Australian rural experience.

Visits

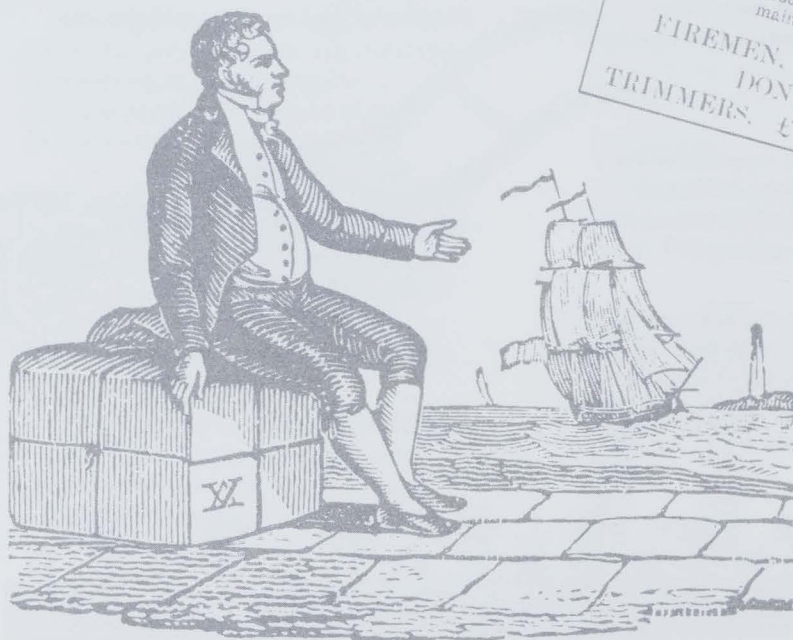

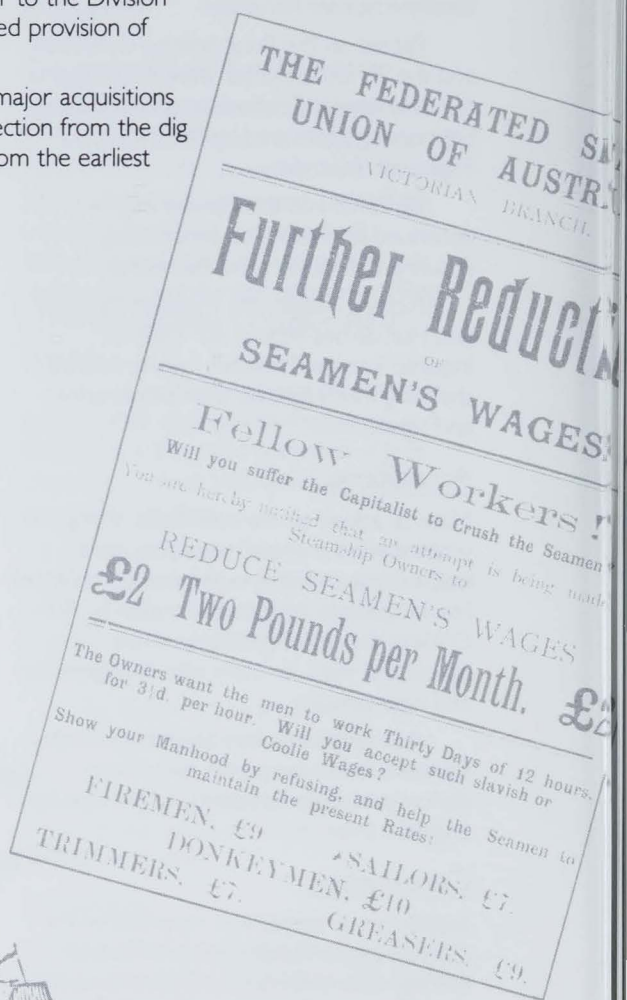

Among many visitors to the Department during the year were the Victorian Premier, The Hon. John Cain, during a general Museum tour, Ms Jenny Lewis of the National Wool Museum, Mr John White of the Australian War Memorial and Mr Ross McMillan of the University of Melbourne.

During the year the Division concentrated on the preservation and presentation of the anthropological collections, in addition to intensive preparations for the forthcoming move to Southbank as the Museum is redeveloped.

A significant organisational change was the transfer to the Division of the Department of Conservation, with the continued provision of services to all divisions within the Museum.

Through purchase and donations, more than 20 major acquisitions were made, including an important archaeological collection from the dig at the Little Lonsdale Street site, containing material from the earliest years of white settlement.

Aboriginal Studies

Facilitating access by Aboriginal people to the Museum's collections was an important aspect of work during the year. For example, under a program sponsored by the Museum through funds provided by the Federal Department of Aboriginal Affairs, visitors were received from the Warrama Living History Centre in Cairns, northern Queensland.

Arrangements for the return of Aboriginal skeletal material from the Murray Black collection continued, with only the component of South Australian origin still to be collected by Aboriginal people.

The Museum's scholarly standing was underlined during the year through the appointment of Curator Lindy Allen as editor of *The Bulletin of the Conference of Museum Anthropologists*.

Conferences

Senior Curator Gaye Sculthorpe delivered a paper, 'What Has Aboriginalisation Meant at the Museum of Victoria?', at the 1988 Conference of Museum Anthropologists and attended the Australian Rock Art Research Conference in Darwin.

Research

Work began on the *Victorian Aboriginal Collection Guide*, with publication expected in 1989/90.

Among other research, Gaye Sculthorpe completed her inquiry into George Augustus Robinson's Tasmanian collection and received training approval and funding for a PhD program focusing on the Museum's Aboriginal collection.

Through the Department of Foreign Affairs, the Director-General of the Anthropological Survey of India, Dr A. Singh, visited the Museum to study the Museum's policies on ethnographic collections.

Another notable visitor was the Craft Adviser at Ernabella over the past 40 years, Winifred Hilliard, who examined artefacts from the Ernabella area and the Seeger photographic collection.

The Donald Thomson Collection

Photographs from the Donald Thomson Collection were provided for reproduction in books and other publications for such bodies as the Federal Department of Aboriginal Affairs and Deakin University as well as specialist authors.

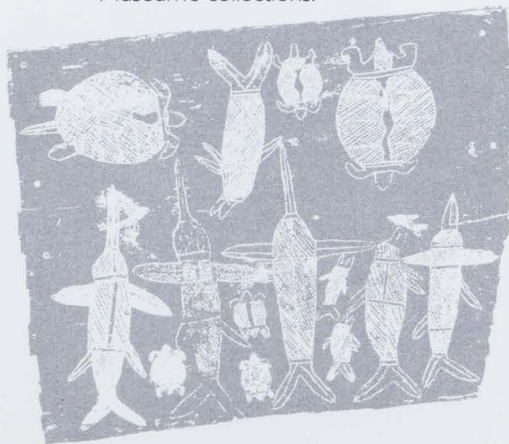

Exhibitions and other public programs

Aspects of the collection were widely presented during the year through a bark painting exhibition in the Thorpe Gallery and filming of parts of the fibre-craft collection for an ABC television documentary.

Planning for future Southbank exhibitions included a field trip to Lake Mungo involving various Museum staff, and a special evening was organised to show films and material from the Donald Thomson Collection.

The Victorian Aboriginal Cultural Heritage Unit

During the year the Unit expanded its range of programs, especially focusing on widening contact with Aboriginal people throughout the State. A research officer was appointed to prepare information for the *Victorian Aboriginal Collection Guide* and Unit staff used the new permanent display, *Koorie*, as the centrepiece for guided tours of the Museum's collections.

Staff effectiveness was enhanced through the appointment of an Aboriginal Educator to provide teaching resources to Victorian schools and Co-ordinator John Atkinson was released from normal duties to take part in the Aboriginal Middle Management Development Program for eight months from October 1988.

A photographic exhibition on Aboriginal women, *Daughters of a Dreaming*, was prepared to tour Victorian country centres following display at the Museum.

Department of Oceanic Studies

The Department's active year included participation in key Museum committees and development of computer databases in addition to extending scholarly research and publication.

Publications

A book of poems by leading writer Mark O'Connor, the Museum's 1987/88 Scholar, was published and the Department edited the Division of Human Studies' first issue of *The Memoirs of the Museum of Victoria*.

Research

Projects included research into material from western Victoria, Papua-New Guinea and Vanuatu.

Conferences and lectures

Staff attended the Conference of Museum Anthropologists in Sydney and lectures were given to the Friends of the Museum and Museum Studies students from Victoria College.

Loans

West African and Ethiopian artefacts from the Museum collection were loaned to La Trobe University and Japanese artefacts were provided to Broadmeadows Municipal Museum.

Collections Management

The Registrar, Collections Management, recorded a particularly busy year, with administration of object movements and acquisitions receipt, in addition to special projects such as work on the Christensen Fund Collection which included a field trip to Brisbane to pack material.

New procedures for acquisition were developed during the year and records administration significantly streamlined.

Acquisitions

The high volume of new material added to the collections this year comprised 220 objects for the Anthropology Collection, 195 for the Victorian Aboriginal Cultural Heritage Trust Collection and 1400 for the History Collection plus 1000 objects from Simpsons Glove Factory.

Computerisation

Progress continued on the massive task of data entry from manual records. In the Aboriginal Studies Department, some 14,000 records were entered; in Oceanic Anthropology, about 10 per cent of 35,000 items were entered; in History, most accession records have been computerised.

Loans

Notable among 22 loans made during the year were bark paintings for the *Dreamings* exhibition and those sent to South Australia's State Conservation Centre for contracted conservation work.

The Christensen Collection was assessed for condition and packing before its dispatch from Brisbane to Melbourne.

Exhibitions

The Department assisted in the installation of the Spoleto Bark Painting exhibition and in demounting *Another Day, Another Dollar*.

Seminars

The Department co-ordinated and presented a seminar for Museum Studies students from Victoria College in conjunction with other Museum Divisions.

Conservation Department

The Conservation Department was active during the year in providing services throughout the Museum and in educational and exhibition programs.

Lectures, conferences and travel

Talks were given at the Museums Association of Australia Conference and to Museum Studies students at Victoria College. Staff travelled to Adelaide to supervise conservation and to Longreach in Queensland to investigate environmental conditions and lighting at the Australian Stockman's Hall of Fame.

Exhibitions

Conservation staff were intimately involved in the installation and demounting of temporary exhibitions and in checking the condition of objects in the permanent displays.

Conservation works

The Preventive Conservation Program covered pest control, environmental monitoring and the upgrading of the Mammals Collection.

Restoration program

Objects from various Divisions of the Museum were treated to ensure their maintenance in good condition and the long-term program of preservation of the bark paintings collection continued.

Objects from the Human Studies Division were sent to Canberra CAE for supervised conservation and under a special allocation work was begun on the Cowley Steam Traction Engine and on 32 bark paintings (both contracted out) in addition to a wide range of internal projects carried out by the Department's professional conservators.

As well, the Department's expertise was made available to clients outside the Museum, including historical societies, individuals and other museums.

History Department

The Department's collection grew by 2400 items this year, focusing on domestic technology, trade unions, costumes, textiles and material relating to children and child-rearing.

Research

Inquiries continued across the spectrum of the historical collection in addition to a project undertaken through a research grant of \$13,000 from the Victorian Women's Trust Ltd, an oral history study of women and work in the home focusing on the community of South Melbourne.

Exhibitions and related programs

A number of displays were mounted from the history collection and planning was begun for *Home Sweet Home*, *Changes in Domestic Architecture*, supported by the Royal Australian Institute of Architects.

Preliminary display briefs were prepared for various new exhibitions planned for the Southbank venue.

Lectures

Talks were given by staff members to diverse groups ranging from the Museums Association of Australia to historical societies, women's groups and retired people.

DIVISION OF MANAGEMENT SERVICES

The Division made several key appointments during the year, continuing to consolidate the provision of support services in accounting, staffing, transport, the library, building security and maintenance.

Building and property

Following an increased funding allocation for 1988/89, significant works were undertaken in the areas of fire safety, environmental conditions, integrated security systems and refurbishment.

Finance

During the year several senior staff were recruited to fill vacancies, restoring the section to full strength. A leasing arrangement was finalised for the souvenir shops, facilitating further economies and improvements in administration.

Accounting procedures were updated and streamlined, enhancing the management of Museum revenue.

Personnel and office services

During the year a significant number of new positions were filled following a special allocation from the Department of Management and Budget to widen public access to the Museum, allowing employment of 20 additional staff members.

An appointment was made to the new position of Office Manager, with responsibility for administrative support functions including Freedom of Information requests, commencing duties early in 1989/90.

Industrial relations

There were no industrial disputes at the Museum during 1988/89.

Stores and transport

During the year the Stores and Transport Office and the Central Store were consolidated into one area, with re-organisation of the storage area continuing. Computerisation of store records and inventories progressed to 80 per cent completion and finalisation is expected in 1989/90.

Library services

The Library expanded its exchange program with 116 new agreements. The *Memoirs* and *Occasional Papers* are now exchanged with some 580 institutions around the world.

The Library acquired and catalogued 814 titles and 513 inter-library loans were processed.

The archives of Dr Philip Law, eminent Antarctic explorer, were temporarily housed in the Library to facilitate access by researchers and a draft agreement was prepared for the proposed transfer of the Royal Society of Victoria's library to the Museum.

Freedom of Information

No Freedom of Information requests were made directly to the Museum. However, the Museum did comply with requests from the Ministry for the Arts to identify any information relating to requests made to the Ministry.

Declaration of pecuniary interests

All members of the Council of the Museum of Victoria and officers and employees of the Museum of Victoria required to complete a declaration of pecuniary interests during the financial year in respect of their offices or employment have done so.

Safety, security and cleaning services

During the year changes were made to the Safety/Security Officer job description with the intention of enhancing equal employment opportunity and in particular of attracting more female applicants.

Additional funding enabled the section to continue to provide a high level of safety and security services throughout the Museum.

Several positions were redeployed this year so that the Communications and Security Control Centre could be manned 24 hours a day as required by the Commonwealth Government for insurance indemnification covering international travelling exhibitions.

The section was intimately involved in the development and documentation of an integrated security system, expected to be installed throughout the Museum and Library buildings in 1989/90.

Internal training for staff was conducted in emergency evacuation, bomb-threat procedures and fire-fighting, with 14 officers also attending TAFE security courses to upgrade skills.

Cleaning services have been revamped to increase efficiency.

Occupational Health and Safety Committee

The Committee, established under the relevant Act, met every two months during the year, completing safety audits, implementing a non-smoking policy, providing guidelines for the supervision of volunteers handling hazardous chemicals and improving consultation procedures on safety and security during exhibition planning.

Buildings Management Committee

The Committee, established under the Museums Act 1983, is responsible for the Museum/State Library Works Program. Committee members in 1988/89 were the President of the Museum Council, Dr R. Marginson (Chairman); a member of the Museum Council, Mr P.S. Parkin; the President of the Library Council of Victoria, Dr N. Curry; and a nominee of the Library Council of Victoria, Mrs J. La Scala.

With the additional funding mentioned earlier in this report, the Committee oversaw the completion of all scheduled refurbishment works and ensured that substantial progress had been made on major improvement projects.

Following the report of architects Anchor, Mortlock & Woolley, the Committee ensured that rectification works immediately required were carried out and that a program of further works would be given priority for completion in 1989/90.

To deal with damage caused by major flooding early in 1989, a report was made and subsequent repair works carried out, with a program devised for roof repair and replacement as required, minimising the possibility of future rain ingress.

Substantial progress was made on completion of works begun in 1987/88 under the Fire Safety Program. The Emergency Intercommunication System was largely completed and is expected to be tested and commissioned early in 1989/90. Work on Stage 3 of the installation of new fire doors was completed and documentation of Stage 4 prepared, with installation to begin in 1989/90.

Work on installation of a new security system began and is expected to be completed in 1989/90, complying with Commonwealth Government requirements for indemnified temporary exhibitions.

Works program

Total allocation for works and services for the Museum and State Library buildings for 1988/89 was \$2,324,800 and total expenditure was \$2,251,520.

The following is a brief summary of the main works undertaken, with expenditure:

Refurbishment

Allocation: \$1,343,000

Expenditure: \$1,330,000

- Improvement and modifications to air handling in the La Trobe Library, the State Library's Photolab and Copy Centre and the Museum Storage Bays;
- Refurbishment of a number of roof areas, the State Library's Staff Amenities, the Newspaper Reading Room, the main Reading Room desk surfaces and reading lamps as well as the Museum's Swinburne and Verdon Halls;
- Installation of special security measures in Swinburne Hall for *Gold of the Pharaohs*, security for exhibitions in McArthur and Irving Benson Halls and installation of a 'book check' security system in the State Library;
- Completion of works requiring immediate attention, relocation of stored material, supply of storage cabinets and shelving to the value of \$145,000 for the State Library and Museum together with the supply of office furniture and telephones for new and relocated staff.

Project provisions

Total allocation: \$834,700

Total expenditure: \$772,365

Specific projects, with expenditure, were:

Dovers Building

Allocation: \$223,700

Expenditure: \$223,659

All scheduled structural and refurbishment works were completed. A decision was made by the Government during the year to sell the building, making it unavailable for further use by the Museum.

Modifications for fire safety

Allocation: \$262,000

Expenditure: \$244,835

Installation of fire doors Stage 3 was completed and work on upgrading the fire rating of stairwells and on the provision of additional emergency exits in the North-west Wing was begun, with completion expected in 1989/90.

Installation of the Emergency Intercommunication System was substantially completed.

Security works

Allocation: \$176,000

Expenditure: \$176,000

Installation of an integrated security system was begun, with completion planned for 1989/90.

Swinburne Hall air-conditioning

Allocation: \$173,000

Expenditure: \$128,000

The Ministry of Housing and Construction ensured that this work was completed to tight schedules in time for the *Gold of the Pharaohs* exhibition.

Urgent and essential works (Departmental allocation)

Allocation: \$400,000

Expenditure: \$398,344

Extensive essential minor works were completed, to enhance health and safety, upgrade staff accommodation and prevent water penetration.

AUDITOR-GENERAL'S REPORT

The accompanying financial statements comprising statement of sources and applications of funds, balance sheet, consolidated statement of changes in equity, revenue and expense statement and notes to the financial statements of the Council of the Museum of Victoria have been audited as required by the *Annual Reporting Act* 1983 and in accordance with Australian Auditing Standards.

Under the Annual Reporting (Contributed Income Sector) Regulations 1988, all material amounts of assets are required to be disclosed in the financial statements. The Council has neither quantified nor valued the land, buildings and certain other real and personal fixed assets including the Collections of the Museum, vested in the Council. Since the Council accepts substantially all the risks and benefits incidental to ownership of these assets, it is my opinion that all assets vested in the Council should have been valued and recorded as assets in the balance sheet.

In my opinion, due to the significance of the matter referred to above, the financial statements do not comply with the requirements of the *Annual Reporting Act* 1983 and do not present fairly the state of the affairs of the Council of the Museum of Victoria as at 30 June 1989 and the results of its operations for the year ended on that date in accordance with Australian Accounting Standards.

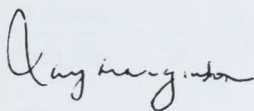

C.A. Baragwanath
Auditor-General
Melbourne
30 November 1989

COUNCIL OF THE MUSEUM OF VICTORIA

In our opinion, the financial statements are in accordance with Section II of the *Annual Reporting Act* 1983 and the Annual Reporting (contributed Income Sector) Regulations 1988 as amended and present fairly the financial transactions during the 1988/89 financial year and the financial position as at 30th June 1989 of the Museum of Victoria.

At the date of this certificate, the Council is not aware of any circumstances which would render any particulars included in the statements to be misleading or inaccurate.

Ray Marginson
President
29 November 1989

Ian Sinclair
Treasurer

Council of The Museum of Victoria

NOTES TO AND FORMING PART OF THE ACCOUNTS

For The Year Ended 30th June 1989

I. ACCOUNTING POLICIES

- (a) These accounts have been prepared in accordance with the requirements of Section 11 of the Annual Reporting Act 1983, the Annual Reporting (Contributed Income Sector) Regulations 1988 and the Annual Reporting (Contributed Income Sector) (Amendment) Regulations 1989. Some 1987/88 disclosures have been amended to comply with the new regulations.
- (b) These accounts have been prepared under the historical cost convention and have not been adjusted to take account of the current cost of specific assets or their impact on the operating result. The accounts have been prepared on an accrual and going concern basis.
- (c) Until 30th June 1984 funds used for the purchases of non-current assets were recorded as expenditure in the year's accounts. The only assets shown in the Balance Sheet were those which were in the form of, or which would or could be converted into, cash its equivalent, viz. investments, debtors, stocks on hand, and those used in the Museum Shop operations. As from 1st July 1984, assets purchased by the Council have been capitalised in the Balance Sheet.
- (d) Depreciation is charged on non-current assets (except Collections) at rates assessed to match the cost of these assets against their estimated economical lives. Depreciation is calculated on the straight line method.
- (e) The collections included on the Balance Sheet consist only of those purchased by the Council from Council Funds (i.e. not including State Budget Funds) and only those acquired since 1st July 1984. They are stated at cost. No provision for diminution has been made as their value is not considered to have diminished, given the purpose for which they are held. The collection is only a small part of the actual collection of the Museum which has been acquired over a long period of time by way of discovery, donations, manufacture and purchase. No money value has been attributed to these items.
- (f) Stocks have been valued at the lower of cost and net realisable value.
- (g) Grants from Government and other sources are brought to account as revenue as received. Expenditure from such Grants are included as expenses when incurred.

2. INVESTMENTS

Investments are held for the purpose of gaining income and are not normally sold before maturity.

They are recorded in the accounts at cost.

Investments on hand as at 30th June 1989 were:

	1988/89 \$	1987/88 \$
CURRENT ASSETS		
Commonwealth Government Securities	6,700	40,000
Semi Government Securities	13,600	30,000
Negotiable Certificates of Deposit, Interest Bearing Deposits and other Money Market Securities	1,460,000	587,437
Other Securities	17,000	–
TOTAL CURRENT ASSETS	1,497,300	657,437
NON-CURRENT ASSETS		
Commonwealth Government Securities	–	166,700
Semi Government Securities	196,400	210,000
Negotiable Certificates of Deposit, Interest Bearing Deposits and other Money Market Securities	500,000	–
Other Securities	–	17,000
TOTAL NON-CURRENT ASSETS	696,400	393,700

3. RESOURCES PROVIDED BY THE MINISTRY FOR THE ARTS

In addition to the expenditure incurred by the Council of the Museum of Victoria an amount of \$11,285,013 (1987/88 \$8,630,228) was from Funds appropriated to the Ministry for the Arts. This expenditure included:

	1988/89	1987/88
\$	\$	\$
SALARIES AND RELATED COSTS	5,540,510	5,008,523
OPERATING EXPENSES:		
Travel & Subsistence	73,440	60,431
Office Requisites, Printing & Stationery	91,503	100,644
Books & Publications	60,434	50,756
Postal & Telephone	88,555	151,624
Motor Vehicle	30,322	34,093
Fuel, Light, Power & Water	103,748	217,376
Incidental	122,551	132,703
Electronic Data Processing	49,916	24,384
Storage & Conservation	172,952	74,064
Research Equipment & Supplies	27,449	10,721
Expenses External Annexes	34,568	31,321
Exhibitions	63,760	88,676
Aquisitions of Works of Art	82,556	39,143
	1,001,754	1,015,936
Other Recurrent Expenses:	44,950	6,582
Works and Services:	4,697,799	2,599,187
TOTAL RESOURCES	11,285,013	8,630,228

4. DONATIONS

	1988/89	1987/88
	\$	\$
Amounts of \$5,000 and over	70,605	43,000
Various smaller donations and collections from Donation Boxes	15,778	12,959
TOTAL DONATIONS	86,383	55,959

The amounts of \$5,000 and over are from various parties which for the current year included:

Haining Victorian Charitable Trust	\$50,000
Spink and Son (Australia)	\$10,000
Victoria College	\$5,605
Perpetual Executors and Trustees	\$5,000
TOTAL OF AMOUNTS OVER \$5,000	\$70,605

5. INTEREST

	1988/89	1987/88
	\$	\$
SOURCES		
Commonwealth Government Securities	20,167	31,894
Semi Government Securities	21,266	28,238
Negotiable Certificates of Deposit, Interest Bearing Deposits and other Money Market Securities	158,177	96,313
Other Securities	2,252	2,438
TOTAL INTEREST	201,862	158,883

6. GRANTS

	1988/89	1987/88
	\$	\$
SOURCES		
State Grants	147,268	167,262
Commonwealth Grants	206,983	103,470
Other Grants	914,169	1,162,009
TOTAL GRANTS	1,268,420	1,432,741

The grants indicated above totalling \$1,268,420 were of an operating nature.

7. SEGMENT REPORTING

- (a) The Council operates in Australia in two distinct areas – the operation of the Museum and in various commercial enterprises.

The commercial enterprises consist of:

- (1) Two Book and Souvenir outlets located near the Swanston and Russell Street entrances. These were operated by the Museum until 30th November 1988. They were leased to a retailer with effect from 1st December 1988. In addition, a Coffee Shop and Take-away food outlet located near the Swanston Street entrance was leased to a retailer with effect from 31st August 1987. Security Deposits are held by the Council to ensure compliance with lease conditions.

- (2) Photographic Services.

- (b) Segment information is as follows:

	Museum Operations		Commercial Operations		Total	
	1988/89	1987/88	1988/89	1987/88	1988/89	1987/88

\$	\$	\$
Debtors	80,142	52,720
LESS Provision for Doubtful Debts	3,500	9,057
TOTAL DEBTORS	76,642	43,663

10. STOCK OF GOODS FOR RESALE

	1988/89	1987/88
\$	\$	\$
Museum Shop	—	169,603
Other	26,864	4,119
LESS Provision for Stock Obsolescence	3,450	
	23,414	—
TOTAL STOCK OF GOODS FOR RESALE	23,414	173,722

11. EXTRAORDINARY ITEM

During the year, the Council sold certain duplicate coins from its collection. The receipt of \$376,950 has been accounted for in the Revenue and Expense Statement. Council has elected to appropriate these proceeds to Trust Funds such to be used specifically for collection acquisitions.

12. EQUITY

"Trust Funds" consist of those funds which may be used by the Council of the Museum for Museum purposes as defined by the relevant Trust deed or will.

"Externally Funded Special Projects" consist of unexpended Government and other grants tied to a specific purpose.

13. FUNDS FROM OPERATIONS

Reconciliation of Funds from operations with surplus is as follows:

		1988/89	1987/88
	\$	\$	\$
Funds from operations		540,250	164,194
LESS Depreciation	90,637		75,664
Provision for Stock Obsolescence	3,450		
Provision for Holiday Pay	5,484		
Provision for Bad Debts			5,190
Writeback Provision for Bad Debts	(5,557)		
		94,014	
SURPLUS FUNDS FROM OPERATIONS		446,236	83,340

14. COMMITMENTS AND CONTINGENT LIABILITIES

There were no known contingent liabilities as at 30th June 1989 (1987/88 \$NIL).

The Council had contracted for capital expenditure amounting to \$17,255 as at 30th June 1989, which had not provided for in the Accounts (1987/88 \$NIL).

15. EVENTS SUBSEQUENT TO BALANCE DATE

On 26th July 1989 a fire gutted the Museum's Coffee Shop. Fixtures and Fittings with a written down value of \$78,035 at 30th June 1989 were damaged. It is anticipated that the tenants' insurance may defray the cost to the Council. However, this is not certain at the date of signing the Accounts. Since the fire the tenants have not been charged rent due to their inability to operate the Coffee Shop. The Council expects to be compensated for loss of revenue during this time.

STATISTICAL DATA

FINANCIAL STATISTICS

Income from Government sources

Operating grant	\$6,587,214
Works and services	\$4,697,799
Special projects	\$345,251
Subtotal	\$11,639,264

Income from non-Government sources

Admission fees	\$169,674
Exhibitions fees	\$115,918
Donations	\$86,383
Trading	\$79,177
Other grants	\$914,169
Interest	\$201,862
Commercial franchises	\$117,510
Sales	\$76,243
Miscellaneous	\$72,121
Subtotal	\$1,833,057
TOTAL INCOME	\$13,472,321

EXHIBITION STATISTICS

Number of temporary exhibitions staged: twelve

Number of visitors to the Museum: 1.3 million

Appendix 6

FEES AND CHARGES

The following fees and charges applied for 1988/89:

	1988	1989	% increase
Planetarium admission			
Adult	\$2.30	\$2.40	4.4
Child	\$1.70	\$1.80	5.9
Hiring charges for Theaterette and Theaterette Foyer			
Weekday evening			
5pm-6pm	\$16.00	\$17.00	6.3
6pm-9pm	\$64.00	\$67.00	4.7
After 9pm, per half hour	\$10.60	\$11.10	4.7
Weekday	\$10.60	\$11.10	4.7
Saturday and public holiday			
First three hours	\$53.00	\$56.00	5.7
Each additional half hour	\$10.60	\$11.10	4.7
Sunday			
Per attendant, first 3 hours	\$75.00	\$79.00	5.3
Per additional half hour	\$10.60	\$11.10	4.7

The increases in fees and charges over the period were made in accordance with guidelines issued by the Premier and the Treasurer.

Figure 1

Figure 1: A line graph showing the relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours spent studying, ranging from 0 to 10. The y-axis represents the score on the test, ranging from 0 to 100. The graph shows a positive linear relationship, with the score increasing as the number of hours spent studying increases.

The graph shows a positive linear relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours spent studying, ranging from 0 to 10. The y-axis represents the score on the test, ranging from 0 to 100. The graph shows a positive linear relationship, with the score increasing as the number of hours spent studying increases.

The following table shows the data points for the graph:

Hours Spent Studying	Score on Test
0	0
1	10
2	20
3	30
4	40
5	50
6	60
7	70
8	80
9	90
10	100

The graph shows a positive linear relationship between the number of hours spent studying and the score on a test.

The graph shows a positive linear relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours spent studying, ranging from 0 to 10. The y-axis represents the score on the test, ranging from 0 to 100. The graph shows a positive linear relationship, with the score increasing as the number of hours spent studying increases.

The graph shows a positive linear relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours spent studying, ranging from 0 to 10. The y-axis represents the score on the test, ranging from 0 to 100. The graph shows a positive linear relationship, with the score increasing as the number of hours spent studying increases.

The graph shows a positive linear relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours spent studying, ranging from 0 to 10. The y-axis represents the score on the test, ranging from 0 to 100. The graph shows a positive linear relationship, with the score increasing as the number of hours spent studying increases.
